THE PENTAGON recently released an issue of the journal Defense Technology International (DTI) about the Navy's establishment of a new command, the Surface Combatant Lead-In-Life (SCL-IL) program. I wondered what the DTI is. Download for free or read online Get Document During the tenure of the SCLIL, a Navy team will provide a long-term strategy for acquisition of a future surface combatant. The SCL-IL program will address the pressing issue of surface warfare. The DTI article reflects a fundamental change in the nature of the surface combatant. We are all familiar with the air wings or the embarked air wing. The Navy has long conducted the surface warfare mission with its air wing. The air wing is supported by the in-water group, which is composed of minesweepers, surface combatants, and in-service and out-of-service shore-based and forward-deployed air support platforms. The air wing provides close air support, electronic warfare and missile defense for surface and subsurface combat. The SCLIL will replace the air wing with a surface combatant lead-in-life mission. The SCLIL will be responsible for carrier landing, offloading, protection and sustainment of surface-based strike systems and air defense systems. Based on my experience with the air wing, I was surprised that the DTI article does not discuss the future status of the In-service Air Wing. No doubt, the In-service Air Wing will provide the backbone of the SCLIL, and operate alongside the future Surface Combatant Lead-in-Life. During World War II, Air Group Eleven (AG-11) was tasked to protect the carrier and provide air defense for the carrier task force. During the Cold War, the air wing was organized into task forces and strike groups. The strike groups were tasked to attack enemy sea and air targets. As the Cold War ended, the air wing was organized into Carrier Strike Groups (CSGs), which comprised carrier, amphibious assault ship, helicopter carrier, mine countermeasure ship, replenishment oiler, and other associated ships that form a nucleus around the 520fdb1ae7
