Reviews of Sony MHC-NX3 AV Latest articles Forum Archive Forum for 2001-2002 I became interested in this mini system (NX3AV) and decided to extract information about it. A lot of stuff found in the e-phone, and the debate over who's better, etc. and decided to hear and see it with your own ears and I came to the audio salon, looked down from top to bottom, felt my hands. The design is like nothing, stylish and tasteful! Then he started listening. The music seemed to pour nothing, pure and expressive, but something confused, and confused some carving in the ears because of a large number of high, sometimes squeaky. By the power of the sound I would not say that the hurricane, there is no sense of shudder. I think that this device should be tested at home, in a cozy environment, then there may be something you understand (meaning - and - the sound of this system). I have a Sony MHC-GRX80 (idea with the RXD8S model, but the GRX80 has higher power output). About the sound of the GRX80, the purity of the sound is about the same as the NX3AV. But there is a plus, there is no such cut in the ears. The grX80's low pulls a lot more powerful (when you put it on the whole coil, that from the phaseinverter the air blows so that at a distance of 1-1.5 meters you can feel the directed flow of power air, and at maximum volume not one bass is not styrs, as is often the case on some AU), and the output itself is incomparable, the walls in resonance come from such a sound, and it gives on the front 2x160W 1Khz 6-Om DIN , against the NX3AV 2x80 or 90W 1Khz 6-Om DIN, (the logistics and center are roughly the same.) q GRX80 3 disk carousel works quickly compared to 5 disk changer at NX3AV (I almost fell asleep until the seller inserted the disk into the changer). The GRX80 has more bells and whistles as much as 2 times if not 3 than the NX3AV. Especially since the price is very distinguishable, we have GRX80 in the region of 520-580\$, and NX3AV 850-900\$. In Moscow, the situation is different, GRX80 in the region of \$360-450, and NX3AV is the cheapest on Gorbushka \$497, and the city in the area of 500-650\$. I'm in a lot of trouble with this NX3AV mini system (why I don't know, but what's in it), so I'm thinking, whether it's worth it sell your device, add n's amount and buy NX3AV? P.S. People, help with the choice! Who has come across, listened to, seen and imet. GRX80 or NX3AV share, help to approach the optimal option, leave what is, or have NX3AV? For any information provided, I will be very grateful. THE HOMELAND WILL NOT FORGET YOU!!! There is no doubt about the feasibility of buying this center. The system is really with real (in this class of systems) Hi-Fi sound. If you are confused by the high frequencies - they can be reduced by the equalizer, but frankly such a sin behind it did not notice. Maybe for her listening chose not the best room (multiple reflection and distortion high). About power - it's for the amateur. I don't think you're going to have to listen to him at all. If you're a fan of getting neighbors, buy a subwoofer for 100-150 w. For the apartment it is enough to listen to music without fatigue. The factory price for NX3 is higher than GRX. The choice is yours. (P.S. Before I make my choice, I went over all the options of Sony and this one was optimal in terms of price/quality) Thank you for the answer. Convinced, I will take NX3AV... Minisystem; acoustics 5.0,CD playback, number of discs: 5;Radio AM, FM; two-cassette deck Buy Review: Mus.center sony mhc-nx1 Music Center SONY MHC-NX3AV. We've already talked about the new concept of building a 4D home theater system promoted by Sony. But this is, so to speak, the maximum option, which is not afforded to everyone. However, if you have at least a video player with Hi-Fi stereo sound and TV, a good cinema can be built, complementing them with the latest Sony MHC-NX3AV mini-system. Sony MHC-NX3AV is built on a block principle: amplifier, tuner, two-cassette deck and CD-changer. Components can be installed in different order and connected between... Sony MHC-NX3AV - announcement of sale in Moscow. Price: \$8,000, sold on January 16. Sony MHC-NX3AV - buy on Yula. A large selection of products in the Music Centers and Tape Recorders category of TV, audio, video. Sony MHC-NX3AV two-barrel mini-system with little second-door specifications: - 2x100 Watt output and 3x35 W - Dolby ProLogic Decoder system, 5.1 multichannel input for the 3D system... It's just an affy music center. sony mhc-nx3av is the best music center in the history of the manufacturer. Instructions to the Sony MHC-NX3 AV Music Center.
