TITLE: Reference Data Analyst

LOCATION: Wall Street Area

CONTACT: Don Chadwick

PHONE: 212-293-6970

EMAIL: don@exft.com

Leading liquidity provider in global markets specializing in market-making and high frequency trading, seeks an exceptional Reference Data Analyst to join our Global Data Systems and Operations Group. GDSO is a business-critical internal group that works closely with trading desks to provide reference data solutions. The scope of our work is company-wide, with exposure to many markets and instrument types across the world. A qualified applicant will become a part of a process crucial to successful trading. Compensation is very competitive and based on performance. In addition to experience and expertise in the field, we are looking for maturity, intelligence, diligence, a sense of ownership and a passion for problem solving.

RESPONSIBILITIES:

- Work within a team of data architects, technologists, and analyst to help build an enterprise level master data solution (EDM)
- On a daily basis, help oversee the processes that source, cross-reference, validate, and correct data from various vendors
- In the course of this work, help identify and implement improvements to these processes
- Document requirements, bugs, procedures
- Design and implement testing procedures
- Answer questions internal clients have about the data, helping them optimize their usage of it

QUALIFICATIONS:

- BS from accredited institution
- Experience of using SQL in working with data
- Keen interest in, aptitude for and experience working with securities reference data (e.g. symbology, closing prices, corporate actions)
- Experience with various vendors' datasets (Bloomberg Backoffice, Data Scope Equities, etc)
- Extremely well organized and detail oriented.
- Ability and desire to take on a high level of responsibility and accountability.
- Excellent communication skills
