In 95% of cases, play files are submitted in . RAR or. The format of the SIP. The first can be downloaded and unpacked with a trial version of WinRAR. To do this, open the archive with this program, click the Extract (Extract to in the English version) button and select any folder on the hard drive, but do not select the folder with the game, as the archive may contain subfolders, and then the file will not work. If the file is archived, it will be enough to open it through the standard Windows Explorer. Sometimes you can find archives with an extension of .7 to unpack them, you will need to download a 7-zip archivist. It's free and very convenient, and it can also work with. RAR and a bunch of other, less popular types of archives. How to install the simulator correctly? When you unpack the archive, find it through Explorer and review the contents of the folder. Usually the coach is one file with an extension. EXE, but sometimes it can include other as well as instructions (usually ReadMe.txt). Установка Установка for all trainers is similar and consists in placing all the files in the distribution of the game, in the same folder where the file is performed is located, which is responsible for the start of the game. Sometimes it's not easy to find, but if you have a desktop icon with which you can start the game, then you can use the following method:1. Click the right button on the icon; 2. In the context that opens, select the Properties option; In the window that opens, go to the Shortcut tab and click on the File location button. The Explorer will then open a folder containing the game's EXE file. The coach must be copied to the same folder unless otherwise specified in the instructions attached to the coach. After that, all you have to do is run the coach and familiarize yourself with the key combinations to activate his capabilities, and then, without closing the coach, start the game.
