Cara menghitung zakat mal pdf

Continue

Paying the sunset is one of the five main obligations of Muslims to be fulfilled. Many people use the arrival of Ramadan to fulfill the obligation to pay the sunset. There are usually two types of sunset that usually cash out during Ramadan. That is, the sunset fitrah, which must be issued by Muslims both old and young. In addition, there is also a zakat mall or zakat property that must be issued by those who qualify as a mandatory sunset. There is also a zakat income that can be paid monthly or annually. Well, if you're going to pay the sunset during Ramadan this year, do you already know how to calculate the right sunset? In order to commit zakat to be well executed, make sure you know how to calculate zakat correctly. The way to calculate the sunset fitrah zakat fitrah is a sunset to cleanse the soul. Every Muslim who can afford it has to pay a sunset fiesta once a year. Sunset fitrah is usually paid during Ramadan as it is up to Eid prayers. Sunset Fistra is also not limited to adults. If you are currently the head of a family that has a wife and three children and two parents, then you are obliged to pay the sunset to those who are on your dependents. Let's look at the following illustration: You are the head of a family with a wife and three children. In your house, and stay mother-in-law. Since you are an older child with a sufficient economic level, you have also experienced the lives of both parents living in different cities. So Ramadan this year your duty to sunset fitrah is eight people. That is for you, your wife, your three children, your mother-in-law and both parents. Sunset fitrah can be paid for in the form of basic food that you consume daily. Many Indonesians choose rice as a means of paying for sunset fitrah. Others also convert basic food into a certain amount of money. Well, how much can each person spend? According to the established rules, the amount of fists per person is 3.5 liters or 2.7 kilograms (kg) of basic foodstuffs. If there is an eight sunset fitrah that you have to cash in, then you need to prepare 21.6 kg of rice. What if you are going to pay the sunset in the form of money? Badan Amil Sunset Nacional, as quoted by Jawa Pos (May 2019) determines the payment of zakat fitrah with money equivalent to Rp40,000 per person. So if you pay zakat fitrah for eight people, you just have to prepare a fund of Rp320,000. Read also: During Ramadan, Pay Sunset Obligation also calculate the sunset of the second Sunset shopping center that you can cash out during Ramadan is a sunset property or a sunset mall. Sunset mall sunset to be issued by a Muslim when his assets or property have reached nisab the equivalent of 85 grams of gold it has for a year. Citing the price of the May 25, 2019 data, the price of gold in the precious metals department pt Aneka Tambang Tbk is Rp666,000 per gram. Thus, the size of the Nisab zakat shopping center this year is 85 grams x Rp666,000 or Rp56.61 million. Thus, if the value of your savings in various forms for the past year is stable, the cost is at least 56.61 million rubles, then you are already obliged to issue a sunset shopping center. The amount you have to spend is 2.5% of the total value of your assets. To be clear, here's an illustration you should look at: You regularly save and invest in instruments ranging from deposits, mutual funds, retail government bonds, stocks and gold. First, first count the total assets that you have outside the home you live in and the cars that you use on a daily daily basis. This is due to the fact that the Sunset shopping center takes into account only assets in the form of deposits, and does not use assets. Your deposit reached 30 million rubles, in mutual funds worth 40 million rubles, retail government bonds worth 50 million rubles, shares worth 20 million rubles, as well as gold deposits worth 40 million rubles. How much zakat should you spend? From the above picture, the total value of assets in the form of deposits and investments reaches 180 million rubles. That is, your savings assets have reached the Nisab zakat shopping center, which is Rp56.61 million. If so, then you should issue a sunset mall. However, remember, the calculation of the sunset amount of the mall is not based on the amount of nisaba, which is Rp56.61 million. That is, if your total savings are Rp180 million, then the sunset of the mall, which you have to pay, is 2.5% x Rp180 million or equal to Rp4.5 million. Read also: Preparing the Hajj Fund with 4 Simple Steps How to calculate zakat zakat sunset income or profession can

actually cash in each month every income that has reached nisab. The income of Nisab zakat is equivalent to 525 kg of basic food that you are used to consuming. Thus, if you consume rice for Rp12,000 per kg per day, then nisab zakat income reaches Rp6.3 million. Thus, if every month you receive an income of 10 million euros, then you are obliged to give out a zakat income. How much to spend? The amount of the sunset income is 2.5% x gross income of 10 million rubles, the result - 250,000 rubles. Ramadan is the right time to pay. Total earnings for the year plus bonuses, then increase by 2.5%. For example, in addition to your salary, you get a bonus of Rp30 Rp30 Thus, your total revenue this year reaches Rp120 million and Rp30 million, which is equal to Rp150 million. So the amount of sunset you have to spend is 2.5% x Rp150 million or Rp3.75 million. Read more: Financial mistakes that young parents should avoid, knowing how to calculate the zakat you have to pay, you can more easily refer it. Sunset cash, there is no longer a burden of obligations that can reduce the cost of your worship as a Muslim. Happy sunset! Sunset Income or also known as the sunset profession; Sunset Income is part of the zakat shopping mall, which must be issued for assets derived from income/regular income from work that does not violate Sharia law. Nishab sunset earns 85 grams of gold a year. Sunset's income rate is 2.5%. The fatwa of the Indonesian Ulama Council (MUI) explains the income in question of every income such as wages, fees, wages, services and other earned halal, or regularly, such as public servants, employees, employees, or non-regular, such as doctors, lawyers, consultants, and the like, as well as income earned from other free work. In practice, sunset income can be cashed out each month with a niche value per month, which is equivalent to the value of one twelfth of 85 grams of gold (after the price of gold foreclosure on the day of cashing out of sunset) with a rate of 2.5%. So if the monthly income exceeded the monthly niche value, then the sunset should be issued at 2.5% of its income There are many types of professions with regular payments or not, with the same income and not in each month. If the income for 1 month does not reach the niche, the income for 1 year is collected or calculated, then the sunset is cashed out, if the net income is sufficient niche. Nishab Sunset Income 85 grams Gold Sunset Rate Income 2.5% Haul 1 year How to calculate Sunset income: 2.5% x Total income in 1 month Example: If the price of gold today is Rp800,000/gram, then nishab sunset income in one year rp68,000,000,-. Mr. Fulan's income is Rp10,000,000/month, or Rp120,000,000, for one year. This means that Mr. Fulan's income is bound to sunset. Then the sunset of Mr. Fulan rp250.000,-/month. Pay for your sunset in BASNAS by clicking here (Source: Koran Sura Al Bakara verse 267, Position of Minister of Religion No. 31/2019, Fatwa MUI No 3/2003, and opinion of Sheikh Yusuf zardawi). Jakarta - Berzakat is a commitment to all Muslims. Berzaqat is also one of the pillars of Islam, which requires that a person foreplay a portion of their income as a network of property that is usually sent through mosques, orphanages or institutions We all know how to calculate the amount of sunset to be paid. detikcom has an zakat calculator object, its function is to calculate the income of the sunset that can be paid each month. As you calculate through the zakat calculator in detikcom very easily, the reader only fills the income box per month and then fills another income field, if any, and then fills the debt/installment box for basic needs, if any, then the amount of income per month. After that, you can directly imagine and the result will be the amount of income sunset commitment that we have to pay each month. The zakat income sunset is issued to everyone receiving a salary/income, including the Vacation Allowance (THR), and the bonus. The sunset to be issued is 2.5% of the total income each month. Please note before paying zakat must also know the name of the nisab or the limit of sunset mandatory property, currently worth 522 kg of rice. If the amount of income is more than the amount of nisaba, then it is obliged to pay zakat income. Whereas if less, it doesn't have to pay. For example, the price of 1 kg of rice is currently Rp 10,000 so the size of the nishab is Rp 5,220,000 million. For example, Aldo receives a salary of 8,000,000 rubles per month, after which he is obliged to pay the sunset income. The amount of zakat, the goak to be paid, is 2.5% x Rp 8,000,000 and Rp 200,000 per month. Still confused by your sunset calculations?
