PoE Builds, PoE Currency Guide and other guides on the Path of Expulsion Gems Updated for Patch 3.6 Best Crafty Guides by OdealoEstimated Budget: lowGuide notesMarch 13, 2019 -Updated for Patch 3.6This Freezing Impulse Elementalist Build is one of the most suitable builds for the Path of Exile Beginners. It doesn't require any specific elements, but provides decent DPS, clear speed and enough protection to start displaying the currency you'll find at the alignment stage. The Freezing Pulse spell was damaged over long distances in patch 3.3, making it even better. With further damage in patch 3.6, Freezing Pulse became one of the best cold spells on the path of exile. You can also check out our other Way of Exile builds right here: Odealo's Crafty Guides - Full ListConvert dmg to download apps. This is a typical spell assembly that revolves around the Freezing Pulse spell.
