Find out more 569kRecoveries and counting We understand that when data is lost, timing can be crucial. This is why we offer different levels of recovery service to meet your needs. Data recovery will begin with a free evaluation that takes about 4 hours (after your media has been received). On average 3 business days Please note: this is the average turnaround time and can vary depending on the severity of the situation, the amount of data data speeds. Four easy steps to get the lost data back. ConsultationContact us 2477365 to get free advice by phone. We will work with you to determine the most cost-effective recovery solution and level of service based on your specific needs. AssessmentS after a few hours after receiving the device our engineers will check The device is free. You will receive a fixed price for recovery work, including an overview of service levels and timeframes. Recovering With your approval, our expert engineers will recover your data using your own tools and techniques. Recovery time will depend on the level of service you choose and the complexity of the job. ReturnOnce your data has been restored, we will send it back to you on a brand new external hard drive that is encrypted for security and sent via delivery the next day. Are there any hidden costs for the valuation? The entire evaluation process is free and we are focusing on a four-hour turnaround for the initial report. What will include a free report? A free assessment report will give you an estimate (%) data that we expect to recover, along with a fixed price for recovery work. How long does it take to recover? It varies depending on the level of service you choose and the difficulty of recovery. Once the score is complete, you will get the estimated turnaround time. How will my details be returned? We will return your recovered data to the new external hard drive, which is delivered to you through the courier. We can also return your failed device or securely dispose of it for you. We know how devastating the loss of important data with your SD card or USB flash is, so we make our recovery priority for you. Our data recovery team can access photos and files from any portable storage facility that has experienced data loss. Find out more Join the more than half a million people and companies that have trusted Ontrack to recover their data. We'll collect your device and evaluate, free to start, start by clicking on the type of media from which you need recovered data. The evaluation time for single hard drives (HDD and SSD), mobile phones and tablets is four hours, and within 24 hours for RAID systems. Data recovery for mobile phones starts at 300 pounds (VATData recovery for one hard drive starts at 399 pounds - VATA free estimate may not be possible for remote data / formatted media It is typical time frame and apply during normal working hours (Monday to Friday, 9am to 5pm).
