Koke'e chords If you want even more ideas for some simple uke songs, there is a great collection on Uke Hunt located chords used. It's a smart way to see how learning just one chord can allow you to play a ton of more songs. Tip for learning new songs: work on one aspect at a time. It really helps break the song down the chords, strum, and vocals. If you try to do everything at once you will fight. First, familiarize yourself with the chords - see them, record, learn their finger. Then take a look at the simple strum without trying to hold the chords. Then sing through the song without trying to play. Once everything is easy apart, start adding pieces together - strum (muddy) and sing or strum and hold chords. Then try to do everything at once. The idea is to get everything running on autopilot in one way or another. If you try to play it all at once with brute determination and thinking power, you might too, but it will feel a lot harder than it should be.
