These NB sets render the wicked strategy problems possessing these two things responsive to adjacencies.
Wicked problems are those that are complex, ill-defined, and have multiple stakeholders with different interests. These problems often have no clear solution, and the solutions that are implemented can have unintended consequences. Wicked problems can be found in a variety of fields, including business, politics, and social issues. The key to solving wicked problems is to approach them with a systems thinking mindset, which involves understanding the interconnectedness of the various elements involved in the problem. Wicked problems require creative, iterative, and collaborative approaches to find solutions that are effective and sustainable.
