Tamil Video for Tick Tok Musical 1.4 - Player Optimized - Replay Replay Option- Performance Optimized- More Content and Features Added More Musical.ly the latest APK 16.5.4 (2021605040) is a video and music sharing app. The app includes music and video making where musers (name call for users of this app) create 15-second videos showing them doing lip syncing and dancing to bloated music. Musically allow you to upload homemade videos, remix videos by compiling others and view related content made by other users. Well, you can, like other videos, giving them a heart on it. File Information musical.ly Last updated: June 17, 2020 Developer: musical.ly Version: 16.5.4 (2021605040) Requirement: Android 4.1 and up file size: 90 MB Downloaded: June 17, 2020 at 10:15 GMT-07 MD5: 34015e1fc2ec5fa35ecc057e8b3 SHA1: 89019fad7cbf8a2c7ab2c7ab2c7ab2f49d166308ef20143 Available in Google Play: Set from Google Play musical.ly app review Musical.ly Android interface for very unpredictable Android terribly busy and a little dirty. However, this is pretty intuitive, as the application works with a fictitious procedure. Grandiose idea Musically creates funny musical social networks. This app has so many features in it. It's a very creative platform for making music and making videos. On the other hand, features are often buggy and juveniles especially teenagers need to set privacy settings before having their hands on it. However, there are frequent updates fixing current problems of core features, especially recording and viewing features. Unfortunately, the application does not come with clear procedures in the form of textbooks. Well, it makes new users have a bit of a hard time using it. The app is really fun and kids can have a private account. Conversely, there is still a search icon in which children and teens can search for any video. The video will be turned off automatically when the app is open. In addition, the app is not able to filter a popular song with bad links and swearing. Children should be supervised by parents to minimize them from being in inappropriate content, and they need to understand when it comes to the security and privacy of sharing content with friends or the public at large. Pros: It offers a better platform for creativity. Musical.ly a free app. Cons: You can find buggy features. How to use to start using Click the yellow plus button on the interface when you open the app. There are two options. First, make a video from stored videos in the phone gallery. It will be open the gallery if you choose this feature. Second, the mode of shooting with your own camera. To record the video, the camera button appears in pink. If the object is dark, put it on a flash button. Click the timer button if you want to shoot a loud video. For a full face shot, there is a reverse camera to click. After shooting, just use a scroll to trim the music button to add a song to the audio. Fix ChangeLog bugs and improve performance. 5 Best Android Auto Apps for Productive Road Trips What better way to relax after weeks or months of hard work than to take a trip.
