HOLDS 2023

POLYTALON

POLYTALON climbing holds are shaped and produced in Germany. Through a combination of patented technology and precise manual work we can produce material-saving and largely waste-free. Our specially developed PU ensures a long service life and that the most delicate grips meet DIN 12572-3. POLYTALON combines the passion for climbing and engineering to ensure durability and perfect haptics.
Always with the focus on the essential - climbing!

WHERE THE ROUGH BLACK FOREST GRANITE MEETS TEXTURAL LIMESTONE AND HUGE ALPS. WHERE SOUTHERN GERMAN PRECISION AND INNOVATION MEETS PASSION AND FREEDOM.

THIS IS WHERE WE ARE.

YINGS —

FORM
FIT
FUNCTION

→ YING SERIES

YING stands for the combination of all essential elements in climbing: fail or send, function and style, light and dark, easy and hard. Yin and Yang become YING. The YING selections are characterized by different undercuts and heights. Positive comfortable jugs, challenging slopers, and flat crimps are represented in varying degrees, left and right-handed. Rotating this climbing hold completely changes the difficulty and preferred hold position. Furthermore, for every YIN there is the matching counterpart YANG and thus again countless block and combination possibilities. Take two holds, block the easy section and open up completely new dimensions of movement. Thanks to these ergonomically rounded shapes, this climbing holds can be playfully built into almost any wall angle.

FATBATS —
UNIVERSAL
SMOOTH
COMBINABLE

→ FATBAT SERIES

Now the family is complete. The FAT BATS are the smooth big partners of the BAT classics, softer and thicker and therefore the perfect bridge to the MACRO BATS. With their prominent smooth line, they continue to attract attention on the wall, both in the "hard" set with Dualtex, as also for entry routes in the "easy" compilation.
The big FAT BAT family includes gentle and easy holds for overhangs, open-hand jugs that work at almost every level of difficulty, and tough sloper and crimps for ambitious climbers and competitions. And best of all, there are countless block options again. In any case, playful route setting is guaranteed. Form and function.
