FOLLOW US WhatsApp Messenger is a FREE app for Android and other smartphones that allows you to exchange messages. WhatsApp uses your phone's Internet connection (4G/3G/2G/EDGE or WiFi if available) to send/receive messages, make calls to friends and family. Go from SMS to WhatsApp and exchange text and voice messages, calls, photos, videos and documents. WHY WHATSAPP: WhatsApp for Android uses your phone's Internet connection (4G/3G/2G/EDGE or WiFi) to exchange messages and make calls to friends and family without restrictions. MULTIMEDIA: Send and receive photos, videos, documents, and voice messages. FREE: Call your friends and family for free using WhatsApp Call, even if they are in another country. (Warning: You may be charged an additional fee for data transmission. GROUP CHAT: Enjoy chatting with your contacts in group chats. This way you can easily stay in touch with friends and family. WhatSAPP WEB: You can also send and receive WhatsApp messages using your computer's browser. NO INTERNATIONAL WORK: There is no additional charge for sending international messages to WhatsApp. Connect with friends around the world and don't for international SMS. WhatsApp uses your phone number in the same way as SMS, and integrates perfectly with your existing address book. ALWAYS ON THE FREE: With WhatsApp, you'll always be online and don't miss messages. There will be no more doubts about whether you have gone online or gone. With your address book, you can easily contact contacts who already have WhatsApp. You no longer need to add hard-to-remember usernames. OFFLINE MESSAGES: Even if you miss notifications or turn off your phone, WhatsApp will keep your messages until they are delivered the next time the program is launched. AND MUCH OTHER: Sending locations, sharing contacts, sharing personal wallpaper, selecting notification sounds, sending chat history via e-mail, sending messages to multiple contacts at the same time, and more! There may be an additional charge for data transmission. For more information, contact your operator. Download WhatsApp apk. We are always happy with your feedback! If you have wishes, questions or complaints, Please email us: android-support@whatsapp.com or follow follow us on Twitter: @WhatsAppPage 2 BEFORE Page 3 BEFORE Page 4 BEFORE Page 5 BEFORE Page 6 FOLLOW Page 7 FOLLOW Page 8 FOLLOW Page 9 FOLLOW Page 10 SUBSCRIBE Page 11 SUBSCRIBE Page 12 FOLLOW Page 13 SUBSCRIBE Page 14 SUBSCRIBE Page 15 SUBSCRIBE Page 16 SUBSCRIBE Page 17 SUBSCRIBE Page 18 SUBSCRIBE Page 19 SUBSCRIBE Page 20 Page 21 ПОДПИСАТЬСЯ FOLLOW US V2.20.200.22 30.9 MB APK 3variants V2.20.200.19 39.3 MB APK V2.20.200.14 39.3 MB APK V2.20.199.14 29.8 MB APK 3variants V2.20.199.12 38.2 MB APK V2.20.198.15 29.4 MB APK 2variants V2.20.198.14 37.6 MB APK V2.20.197.20 29.2 MB APK 2variants V2.20.197.18 37.4 MB APK V2.20.197.17 29.3 MB APK 2variants V2.20.196.16 29.2 MB APK 2variants V2.20.195.17 28.9 MB APK V2.20.195.16 38.6 MB APK V2.20.195.15 28.9 MB APK V2.20.195.13 38.6 MB APK V2.20.194.16 28.8 MB APK V2.20.194.15 38.4 MB APK V2.20.193.10 37.8 MB APK V2.20.193.9 28.1 MB APK V2.20.193.8 37.8 MB APK V2.20.193.6 37.8 MB APK V2.20.189 28.9 MB APK WhatsApp Inc.CommunicationUSK: All agesWhatsApp Business from FacebookWhatsApp Business enables you to have a business presence on WhatsApp, communicate more efficiently with your customers and help you grow your business. If you have separate business and personal phone numbers, you can install WhatsApp Business and WhatsApp Messenger on one phone and register them with different numbers. In addition to the features available in WhatsApp Messenger, WhatsApp Business includes: BUSINESS PROFILE: Create a profile for your business to help your customers find valuable information - like your website, location, or contact information. BUSINESS MESSAGING TOOLS: Be more responsive to your customers by using Messages Away to indicate when you are away or a welcome message to send your customers an introductory message when they first message you. During the check, choose call me to get the code over the phone. WhatsApp Business is built on top of WhatsApp Messenger and includes all the features that you rely on, such as the ability to send multimedia, free calls, free international messages, group chat, standalone messages, and more. Contact your service provider for more information. Note: once you've backed up the chat from WhatsApp Messenger to WhatsApp Business, you'll no longer be able to restore it back to WhatsApp Messenger. If you want to go back, we recommend you copy WhatsApp Messenger backup on your phone to your computer before you start using WhatsApp Business.----- We are always happy to hear from you! If you have any feedback, questions or concerns, please email us at smb@support.whatsapp.com or follow us on Reliability, scalability and portabilityB. Protection. CompatibilityD. Sustainability and redundancy10. Three NIMS guidelines: Flexibility, Standardization, Unity of Effort.B. Unity of Effort, Readiness, Resource Management.C. Planning, Response, Recovery Resources, Organization, Standardization11. Using social media to support activities such as mapping and incident visualization is an example of what is the standard of communication?A. Common terminology, simple language, and compatibility. None of the Above. Using technology and procedures. Information security/operational security12. What is the task of resource management deploying or activating personnel and resources? A. Identify RequirementsB. Track and ReportC. Order and purchase. Mobilize13. Which of the following functions is EOC?A. Coordinating plans and identifying resource needsB. All of the above. Collecting, analysing and sharing informationD. Ensuring coordination and policy direction14. What is the characteristic of NIMS management among subordinates who report directly to the manager?A. Modular OrganizationB. Chain of Command and Unity CommandC. Office of PurposeD. Managed control range15. Ensuring the smooth flow of information describes the principle of key communication and information systems?A. Reliability, Scalability and PortabilityB. Protection. CompatibilityD. Sustainability and redundancy16. Which organizations should participate in communications planning? A. MAC GroupsB. All stakeholders. The district was in command. Planning Section17. Which NIMS command and coordination structures are behind the locations where staff from several agencies gather?A. Incident Command (ICS)B. Emergency Operations Centers (EOCs)C. Joint Information System (JIS)D. MAC Group18. Incident reports, such as situation reports and status reports, raise awareness of the situation and ensure that staff have access to the information they need. FALSE19. The incident plan was prepared by the General Staff, from which section?A. OperationsB. Finance/Administration. Planning D. Logistics20. Jurisdictions, receiving mutual assistance, can get resources if they don't meet her needs. ShopC. Refused. Neglect21. When an incident occurs or threatens, local emergency personnel manage the response using the principles of NIMS and ICS. If the incident is or becomes large or complex, federal authorities are helping.B. Local EOCs activate.C. Created Unified Command.D. Mutual Assistance Agreements are implemented22. It can make it more difficult to share information between emergency personnel. State-of-the-art equipmentC. EquipmentC. SourcesD. social media24. What type of ICS facility is used for temporary assignment and accounting for personnel, supplies, and equipment awaiting appointment?A. Incident BaseB. Incident Command Post. In the camp. Staging zone25. At NIMS, resource inventory refers to preparedness activities conducted outside of incident response. FALSE26. Which major component of NIMS describes recommended organizational structures for incident management at the operational and incident support level?A. Resource ManagementB. Command and coordinationC. Communications and Information Management27. What resource management activities establish common definitions of staff, equipment, groups, supplies, and facilities?A. Identify and input. Acquisition, storage and inventory of resourcesC. Skills, certification and certification of staffD. Resource planning28. The issue is the central location of the Joint Information System (JIS) of operations and where public information officers perform public relations functions.A. Joint Information Center (JIC)B. MAC GroupC. Emergency Operations Center (EOC)D. Incident Command Point29. Mac Group does not replace the main functions of the EOC or other dispatch organizations.A. TRUEB. FALSE30. When only certain members of the EOC team or organization are activated to monitor a real threat whose activation level has been implemented?A. Level 1 - Full activationB. Level 4 - EOC is not required.C. Level 3 - Normal Operations/Sustainability. Level 2 - Improved Sustainable-State31. The ability of emergency management and response personnel to interact and work well together describes which of the key principles of communication and information systems?A. Reliability, scalability and portability. Protection. Sustainability and redundancyD. Compatibility32. NIMS components adapt to planned events such as sporting events. FALSE33. EOCs can be fixed locations, temporary entities, or virtual structures involving staff remotely. FALSE34. What is the characteristic of NIMS management includes documents that record and communicate the purpose of incidents, tactics and assignments for operations and support?A. General terminologyB. Information and intelligence management. Integrated communication. Incident planning 35. When an incident occurs or threatens, local emergency personnel manage the response using the principles of NIMS and ICS. If the incident is or becomes large or complex, federal authorities are assisting.B. Local EOCs activate.C. Mutual Assistance Agreements are implemented. What does NIMS management characteristics include the use of names and definitions for core organizational functions and units?A. General terminologyB. A single command center. Comprehensive resource management. Modular Modular What characteristic of NIMS management follows established processes of data collection, analysis, evaluation, exchange and management?A. Common TerminologyB. Information and intelligence management. Creating and transferring commandD. Integrated communications38. What is the characteristic of NIMS management that allows units of different agencies to connect, share information and achieve situational awareness?A. Incident Planning. Information and intelligence management. Integrated communication. Comprehensive resource management39. At NIMS, resource inventory refers to preparedness activities carried out during incident response. outside K.D. Instead of 40. Which EOC configuration allows staff to operate in the EOC with minimal preparation or launch time?A. ICS or ICS-like EOC structureB. Strategic Joint Command Structure. The office structure. Incident Support Model Structure (ISM)41. ICS provides a standardized approach to emergency personnel command, management and coordination. unactivated C. On stage. Outside the site42. As for input, which of the following characteristics are usually used to classify resources?A. CapabilityB. LocationC. The number is available D. Color 43. Which major component of NIMS describes recommended organizational structures for incident management at the operational and incident support level?A. Resource ManagementB. Communications and information management. Command and coordination44. Which structure does NIMS develop, recommend and implement public information plans and strategies? Incident management systemC. Emergency Operations Center (EOC)D. Joint Information System (JIS)45. EOCs receive senior level guidance from:A. MAC GroupsB. Incident management systemC. Joint Information Center. Joint Information System (JIS)46. Full EOC activation may include staff from support agencies.A. TRUEB. FALSE47. Which structure of NIMS makes joint multi-team decisions? Incident management systemC. Emergency Operations Center (EOC)D. Joint Information System (JIS)48. What resource management task establishes and maintains resource availability and ensures timely payment for providers?A. Reimburse and RestockB. Track and ReportC. Mobilized. Order and purchase49. What is the characteristic of NIMS management that helps to eliminate confusion caused by conflicting instructions?A. CommandB Chain and Unity. Office of PurposeC. Information and Intelligence ManagementD. Accountability50. What characteristic of NIMS management includes the development and issuance of tasks, plans, procedures, and protocols for performing tasks?A. Managed ControlB range. Comprehensive resource management. Modular Office of Goals51. At NIMES, when leaders plan and prepare for the demobilization process?A. At the end of the end incident.B. During the recovery.C. At the same time they begin to mobilize resources. When moving between operating periods.52. What communication management practice includes specifying all communication systems and platforms that parties will use to share information?A. Equipment standards. AgreementsC. Politics and planningD. Standardized communication types53. What characteristic of NIMS management includes maintaining accurate and accurate inventory of personnel, equipment, teams and supplies?A. Comprehensive Resource ManagementB. Incidents and locationsC. Office of PurposeD. Send/Deploy54. Establishing mutual assistance agreements to obtain resources from neighbouring jurisdictions is an example of what resource management activities?A. Acquisition, storage and inventory of resourcesB. Identify and input C. Skills, certification and certification of staffD. Resource planning55. What is the NIMS guidelines that supports compatibility between multiple organizations?A. EffortB Unity. AdaptabilityC. StandardizationD. Flexibility56. What is the task of resource management determines the type, number, location of receipt and users of resources?A. Order and AcquireB. Track and ReportC. Mobilized. Identify the requirements57. Which member of the command staff serves as the contact point for incident command organizations not included in the Incident Command or Joint Command?A. Public Information OfficerB. The district commander. A security officer. Communications officer 58. What is the purpose of resource management that involves activating local resource needs, if any?A. Track and ReportB. MobilizationC. Order and purchase. Reimbursement and Recharge59. One of the functions of the EOC is to provide coordinated support to incident command, personnel at the scene and other EOC if necessary. FalseFEMA ICS 700 Responses and TimelineFlexibilityStandardizationUnion EffortAllows NIMS will be scalable from routine, local incidents through those who need interstate mutual assistance up to those who need federal assistanceSBY compatibility between multiple organizations in responding to incidents Of the standard organizational structuresThe improved integration and connectivity between organizations Is the incident-response of personnel and organizations to work together effectively Reporting effective communication

prepared organizations with jurisdictional powers or functional responsibilities to support each other, allowing each participating agency to maintain their own power and accountability. Resource Management2. Command and Coordination3. Communications and Information Management MechanismsStandard for systematic resource management, including personnel, equipment, materials, groups and facilities, both before and during the so that organizations can share resources more effectively when they need to, guide processes, as well as recommended organizational structures for incident management at the operational and incident support level, explains how these structures work together to effectively and effectively manage incidents, as well as information management systems and practices that help ensure that incident personnel and other decision-makers have the tools and information they need to make and transfer decisions4 Key resource management activities.1 Identify and input.2 Skills, certification and staff certification3. Resource planning4. Acquisition, storage and inventory of resources Equipment resources to perform their function in one or more of the five areas of the mission: Prevention, Protection, Mitigation, Response and Recovery Feature for which the resource would be most useful (firefighting, law enforcement, health and medicine)Broad characteristics such as personnel, equipment, teams and the level of facilitiesA resources to perform their function depending on the size, capacity, or experience and qualifications; Type 1 has a greater capacity than type 2, 3, or 4Personnel to meet minimum established standards (including training, experience, physical and medical fitness) to fill specific positions From AHJ or third party that a person has completed a qualification for a position-usually ID card or badge that identifies staff and verifies their qualifications for a specific positionIdentify Requirements (Resource Management) Identification:1. Type and number of resources needed2. Where resources should be sent3. Who will receive and use input resources is designed to be used here to provide resources provided to meet the needs of mission-tracks location resources-Helps staff prepare to receive and use resources- Protects the safety of personnel, equipment, teams and facilities-Enables Resource Coordination and MotionThere Demobilization is an orderly, safe and effective return of the resource to its original location and statusReimburse and Restock (RM) Install and maintain resource readiness2. Collecting bills and checking costs3. Make sure resource providers are paid in a timely manner4. Restocking by replacing or repairing damaged equipmentSy resources and services between jurisdictions or organizations1. Incident Command Point (ICP)2. Staging zones3. Incident database4. CampsIncident Command Post- Tactical Level Location, Incident Management at the Scene (Incident Commander or Joint Command and Headquarters) Provisional position and personnel, supplies and equipment in anticipation at which staff conduct primary support activities (may be in conjunction with SMEs) Incident-based satellites, identified where they can best support the incident incident by providing food, sleeping areas, sanitation, and minor maintenance and maintenance equipment, the management of numerous incidents or a very complex incident is by creating multiple ICSOn-scene organizations, tactical-level response from out of place to:1. Eliminating imminent threats and dangers2. Provide coordinated support to incident command, on-the-scene personnel and/or other common ways to organize EOC1. ICS or ICS-like structure2. Structure of the incident support model3. Administrative structureIncipod state/partial activationNormal operations/sustainable state1. Act as a political body2. Priority support resources and distribution3. When making joint multi-day decisions4. Include decision-making among elected and appointed officials and incident commander, incident managementIntegrate incident information and community affairs into a single organization that provides consistent, coordinated, accurate, accessible, timely and complete information to the public and stakeholders during incident operations1. Develop and deliver coordinated interagency communications2. Develop, recommend and implement public information plans and strategies3. Public affairs advice that may affect incident management efforts4. Address and manage rumors and inaccurate information that can undermine public confidence in informing the public1. Gathering2. Check3. Coordination4. The spread of the Federal Government only becomes involved in the response when:1. State governors or tribal leaders are asking for federal assistance, and their requests are approved2. Federal interests are involved3. Statute or regulation is sanctioned or requires four key principles of communication and information systems1. Compatibility2. Reliability, scalability and portability3. Sustainability and redundancy4. High-security destinations, including decisions on resource priority, role and responsibilities, and general incident management courses Communication between and between on-site personnel and tactical personnel and collaborating agencies and organizationsCoordination and support for strategic and tactical communications and warnings, press conferencesIncident-specific plans to raise situational awareness and description of the purpose and tactics of incident management Common communication protocols allow the dissemination of information among all elements of incident managementCoctoria NIMS Management Characteristic includes in the documents that are recorded and communicated with the objectives of the communications protocols? What structure of ICS allows different jurisdictions to jointly manage and direct activities with a single incident plan? What is the characteristic of NIMS management that follows established processes of data collection, analysis, evaluation, exchange, and management? Information and ManagementWhich NIMS Management Characteristic includes the use of standardized names and definitions for core organizational functions and units? What is the ability to coordinate resources throughout the incident? Each ICS General Staff is headed by a(n), which is assigned directly to the Incident Commander or Unified Command.Three NIMS Guidelines: Flexibility, Standardization, Unity of EffortWhy is the task of resource management deploying or activating personnel and resources?A. Identify RequirementsB. Track and ReportC. Order and purchase. MobilizeWhat of the following functions of EOC?A. Coordinating plans and identifying resource needsB. All of the above. Collecting, analysing and sharing informationD. Ensuring coordination and policy direction. Chain of Command and Unity CommandC. Office of PurposeD. ControlID controlled overflight.
