Mathematical physics by hk dass and dr rama verma pdf

Stock image of this item: S. Chand and Company Ltd. Paperback. Condition: New. 5 or later edition. Module-1: The usual differentiation and theorem of Leibniz, Tracking curves, Lradius from curvature Andevolutes, Asymptotes, Differential Equations, Module-Ii, Linear Differential Equations of the Second Order with Permanent Coefficient, Module-Iii: Seriessolutions of the Second Order Differential Equations, Bessel Features. 0. Seller inventory No. 86304BV More information about this seller Contact this seller. Stock image of this item: S. Chand and Company Ltd. Paperback. Condition: New. 5 or later edition. For B.E./B.Tech./B.Arch. second semester students of Mumbai Technical University. This book is divided into 28 chapters on the subject of the curriculum. The theme is presented in a very systematic and logical manner. The book contains a pretty big No. of the published examples from the question of the examination papers recently conducted in different cases in the response to these problems during the examinations. The last issues of the documents of the second semester of Mumbai Technical University, for 2008-2009-2010 was fully resolved in this book. Printed pages: 615. 0. Inventory Seller No. 9497BV For more information about this seller Contact this seller 2. Stock image of this item: S. Chand and Company Ltd, 2011. Soft cover. Condition: New. First edition. B.E/B.Tech. Students of the second semester of Maharsi Dayanand University, Rohtak and Kurushetra University, Kurushetra. The last issues of the documents of the second semester of May 2010, December 2009 MDU and December 2009 in the UK, were resolved and included in the text. Special features: Lucid and simple language A large number of decided examples of Tbluar expression specific themes Presentation in a very systematic and logical manner. Content Table Section A: Difference of Vector Integration Section B: Accurate Differential Equations Differential Equations First Order Linear Differential Equations of the Second and Higher Order Cauchy Parameter Change Method, and Legendre's Linear Equations Simluataneous Linear Differential Equation Application of Linear Differential Equations Section Seller Inventory No. Stock image about this item: S. Chand and Company Ltd., 2009. Soft cover. Condition: New. First edition. This book is primarily written in accordance with the Unified Curriculum (2008-2009) mathematics of the third semester for all engineering colleges associated with Rajiv Gandhi Proudhyogiki Vishwavidyalaya, Bhopala, M.P. This book also covers B.Tech, B.E., B.Arch. Third semester course of other Indian engineering colleges, the book is divided into 22 chapters on the curriculum. Content: 1. FUNCTIONS OF A COMPLEX VARIABLE-I, ANALYTIC FUNCTION 2. INTEGRATED INTEGRATION 3. POWER SERIES 4 IS A COMPLEX VARIABLE VIEW. CALCULATING RESIDENCES (INTEGRATION) . . . 21.SAMPLING METHODS 22. TAGUCHI LOSS FUNCTION (ROBUST DESIGN METHODS) Printed pages: 774. Seller Inventory No. 9493BV For more information about this seller Contact this seller 4. Stock image of this item: S. Chand and Company Ltd, 2010. Soft cover. Condition: New. First edition. This book is primarily written in accordance with the curriculum for B.E./B.Tech. Students I sem. of MDU, Rohtak and Kurushetra University. Special features : Lucid and simple Laguage th jective Types of Issues, A large number of solved examples, Tabular explanation of specific topics, presentation in a very systematic and logical manner. Printed pages: 886. Seller Inventory No. 64917BV For more information about this seller Contact this seller 5. Stock image of this item: S. Chand and Company Ltd, 2014. Soft cover. Condition: New. 5 or later edition. For B.E./B.Tech./B.Arch students. II Semester Uttarakhhand Technical University, Dehradun under the new program 2010-2011. Content: Useful Results, UNIT?? I: Differential equations, Linear differential equations of the higher order, differential equations of other types, application of differential equations, UNIT?? II: Series of Solutions and Special Features, Series Solutions Second Order Differential Equations, Bessel Features, Legendre Features, UNIT?? III: Laplace Transformation, Laplace Transformation, UNITE No?? IV: Fourier Series - Partial differential equations, Fourier series, Partial differential first-order equations, nonlinear partial differential equations, linear homogeneous and non-homogeneous differential equations, UNIT?? V: The use of partial differential equations, the application of partial differential equations, the questionnaire, the index of printed pages: 495. Seller Inventory No. 9449BV For more information about this seller Contact this seller 6. Stock image of this item: S. Chand and Company Ltd, 2013. Soft cover. Condition: New. 4th edition. The previous edition of the book was textual material for both the first and second semesters. The book has been carefully revised according to The New Sillabai of Maha Maya Technical University, Noida and Gautam Buddha Technical University, Lucknow. Content: Block 1 : Differential Equations Solution Of the Unit-II Series and Special Features (en) Block-III Laplace Conversion: Four Series and Partial Differential Equations (En) Unit-V: Application of Partial Differential Equations Printed Pages: 604. Seller Inventory 9490BV For more information about this seller Contact this seller 7. Stock image of this item: S. Chand and Company Ltd. Paperback. Condition: New. 5 or later edition. Edition. Unit I, Limits and Continuity, Ordinary Differentiation, Tangents and Norma, Maxim and Minim (one variable), McLaurin and Taylor Theorem, Uncertain Forms, Curvature Radius, Partial Differentiation, Euler Theorem, Full Differentiation, Error and Approximation, Taylor Series of Two Variables, Maxim Length, Surface Area, Pappus or Guldin Theorem, Double and Triple Integrals, Gamma Beta Features, Differentiation under the sign of Integral, Unit III, Differential Equations, Linear Differential Equations of the Higher Order, Block IV, Albrage Matrix Inventory Seller No. 9491BV For more information about this seller Contact this seller 8. Stock image of this item: S. Chand and Company Ltd, 2014. Soft cover. Condition: New. 4th edition. For B.E./B.Tech/B.Arch. Students of the first semester of all engineering colleges of Utrahand, Dehradun (Single Curriculum). In accordance with the curriculum 2006-07 and beyond. The theme is presented in a very systematic and logical manner. The book contains quite a number of solved examples from question paper exams recently conducted by various universities and engineering colleges. Issue Documents 2009-2010,2008-2009 ad'nd 2007-2008 resolved and included. This edition adds more than 600 objective questions. Content: Useful Results, UNIT?? I: Matrix, Algebra Matrix, Matrix Rank, Simultaneous Equation Solution, Eigen Values and Eigen Vectors, UNIT II: Differential Calculus?? Me, Ordinary Differentiation and Leibniz?? s Theorem, UNIT III : Differential Calculus?? II, Partial Differentiation, Complete Differentiation, Expansion of the function of several variables, Jacobins, errors, extreme function of multiple variables, tracking curves, UNIT?? IV : Multiple integrals, double integrals, triple integral, gamma, beta function, differentiation under integral sign, UNIT?? V : Vector calculus, vector of differentiation, integration vector, question documents, index of printed pages: 764. Seller Inventory No. 9448BV For more information about this seller Contact this seller 9. Stock image of this item: S. Chand and Company Ltd, 2014. Soft cover. Condition: New. 5 or later edition. For students of BE/BTech /B Arch for the third semester of all engineering colleges of The Technical University of Maha Maya, Noida and the Technical University of Gautama Buddha, Lucknow. This book is primarily written in accordance with the Unified Curriculum (2009-2010) Mathematics III for all engineering colleges affiliated at U.P.Technical University, Lucknow. Content: 1. FUNCTIONS OF COMPLEX, ANALYTICAL FUNCTION 2. INTEGRATED INTEGRATION 3. AND SERIES 4 OF LAURENT. CALCULATION OF BALANCES (INTEGRATION) 5. STATISTICAL TECHNOLOGY-I 6. THE LOWEST SQUARE METHOD IS 7. CORRELATION AND REGRESSION 8. CORRELATION AND MULTIPLE REGRESSION ANALYSIS 9. ODDS 10. BINOMIAL DISTRIBUTION 11. POISSON DISTRIBUTION 12. NORMAL DISTRIBUTION 13. SAMPLING METHODS 14. TIME SERIES 15. STATISTIC CONTROL GOOD (Control charts) 16. TRANSCEDENTAL AND POLYNOMIAL EQUATIONS (Bisaction Method, Regula Falsey, Newton Rafson Method) 17. THE FINAL DIFFERENCES ARE 18. INTERPOLATION WITH EQUAL INTERVALS (FORWARD NEWTON AND REVERSE INTERPOLATION) 19. INTERPOLATION WITH UNEQUAL INTERVALS (Lagrange's, Divided Newton's Discrimination Formula) 20. SOLUTION OF SYSTEM OF LINEAR EQUATIONS (Kraut Method, Gauss Seydal Method) 21. NUMBER DIFFERENT 22. NUMERICAL INTEGRATION 23. NUMERICAL SOLUTIONS OF THE USUAL DIFFERENTIAL EQUATIONS PRINTED PAGES: 624. Seller Inventory No. 10507BV For more information about this seller Contact this seller 11. Stock image of this item: S. Chand and Company Ltd, 2014. Soft cover. Condition: New. 5 or later edition. The book has been carefully revised in accordance with the new curriculum of the Technical University of Maha Maya, Noida and the Technical University of Gautama Buddha, Lucknow. Highlights: objective types of questions, multiple choice issues, filling in gaps, True and False, type compliance (Total No. issues of objective type more than 600), Additional important examples. Content: Block -1: Differential Calculus-I, Block-2: Differential Calculus-II, Block -3: Matrix, Block-4: Multiple Integrals, Block 5: Vector Calculus. Printed pages: 800. Seller Inventory No. 9488BV For more information about this seller Contact this seller 12. Stock image of this item: S. Chand and Company Ltd. Paperback. Condition: New. 5 or later edition. For B.E./B.Tech./B.Arch. third semester students of all Uttarakhhand Engineering Colleges (Single Curriculum). Under the new program 2006-2007 and beyond Uttarakhhand Technical University, Dehradun. The book is a completely revised edition and typos have come to the knowledge to have been removed. The 2008-2009 and 2007-2008 issue document has been resolved and included in the text. Printed pages: 532. 0. Inventory Seller No. 86247BV For more information about this seller Contact this seller 13. Stock image of this item: S. Chand and Company Ltd, 2014. Soft cover. Condition: New. 5 or later edition. Block i: Sets and features 1. Sets 2. Cartes product sets and relationships 3. 4. Measuring corners 5. trigonometry functions6. trigonometry ratios of complex angles 7. Formula 8 conversion. trigonometry functions of multiples and submultpls of angles 9. trigonometry equations 10. sinus and cosy of the unit formula ii: 11. Mathematical induction 12. Complex numbers 13. polar form of complex numbers 14. 15 square equations. Linear Linear 16. permutations 17. 18. Binomial theorem 19. arithmetic development 20. geometric progression 21. arithmetic-geometric series and special series of unit iii: geometry coordinates 22. 23 rectangular coordinates. straight lines 24. the general equation of line 25. unit iv circles: unit calculation v: mathematical reasoning unit vi: statistics and probability of value based on questions Printed pages: 1290. Seller Inventory No. 87677BV For more information about this seller Contact this seller 14. Stock image of this item: S. Chand and Company Ltd, 2016. Soft cover. Condition: New. 5 or later edition. For students B.Sc (Hons.) and M.Sc. Content: CONTENT: 1. Introduction 2. The cinematic fluids in motion 3. The motion equations of the invisible liquid 4. One-dimensional unsized irrepressible flow (Bernoulli???? s equation and its application) 5. Movement in two dimensions and sources and shells 6. General theory of movement irote 7. The movement of cylinders 8. Irregular movement in three dimensions (sphere movement). Stokes?? s Flow 9 function. Vortex movement (rectiline vortexes) 10. Waves 11. General theory of stress and voltage speed 12. The navigator stokes the equations and the energy equation 13. Dimensional analysis, immeasurable constants (numbers) Flow resemblance 14. Laminar flow of viscous irrepressible liquids 15. Border layer theory 16. Stopping traffic is much more. Additional topics and settled examples throughout the book. Printed pages: 1396. Seller Inventory No. 9645BV For more information about this seller Contact this seller 15. Stock image of this item: S. Chand and Company Ltd, 2014. Soft cover. Condition: New. First edition. It gives me great pleasure to present a useful textbook B.Sc and M.Sc (physics) to the students of the Higher Mathematical Physics. This book is written in accordance with the curriculum of various universities. The contents of the book are divided into six units. Each unit is further divided into simple and short chapters to avoid ambiguity. The material was organized to ensure the suitability of the book for use in the classroom and for individual self-study. To better understand students, a number of decided examples on various topics were included in the textbook. Caution was made to systematically evaluate examples. When solving examples, even minor steps were not missed to take care of readers' difficulties in understanding the subject easily without wasting much time. Most of the examples were taken from recent exam papers, which should introduce students to the trend of exam questions. Printed pages: 0. Seller Inventory No. 86786BV For more information about this seller Contact this seller 16.
