While the best torrent sites can give you the desired content, they can be short-handed in some areas. In other words, you're not anonymous when you download files from the BitTorrent network. A workaround to this is via a VPN that allows users to hide their IP address. Is the use of BitTorrent on the decline? The popularity of torrent sites is slowly declining due to reasons such as law enforcement crackdowns. Regular users of the BitTorrent network may well remember how torrent giants KickAss and ExtraTorrents went down. There is also a growing demand for VPN services that unlock torrent sites. Another important factor is the increase in the number of streaming services such as Netflix and Amazon Prime. There are tons of free movie streaming sites as well as online for free entertainment.
