This information contains information about Robinhood Financial's credit policy, interest expense and the risks associated with margin accounts. Investors should carefully consider the investment objectives and unique risk profile of Exchange Traded Funds (ETFs) before investing. ETFs are subject to similar risks to other diversified portfolios. Leveraged and inverse ETFs may not be suitable for all investors and may increase volatility risk through leverage, short selling of securities, derivatives, and other complex investment strategies. Although ETFs are designed to deliver investment results that generally match the performance of their respective underlying indices, expenses and other factors may not accurately replicate the performance of the indices. A prospectus contains this and other information about the ETF and should be read carefully before you invest. Customers should receive prospectuses from issuers and/or their third-party representatives, distribute and make available prospectuses for review. ETFs are required to distribute portfolio profits to shareholders at the end of the year. These gains can be generated through portfolio realignment or the need to meet diversified requirements. ETF trading will also have tax consequences. Further regulatory guidelines on exchange-traded products can be found here. Option transactions can involve a high level of risk. Please read the options disclosure document, titled Features and Risks of Standardized Options Available through about.robinhood.com/legal or theocc.com, to learn more about the risks associated with options trading. Investors should be aware that system response, execution price, speed, liquidity, market data, and account access times are affected by many factors, including market volatility, size and type of order, market conditions, system performance, and other factors. All investments involve risks and past performance of a security or financial product does not guarantee future results or returns. Keep in mind that while diversification can help spread risk, it does not secure profit or protect against losses in a downmarket. There is always the potential to lose money when you invest in securities or other financial products. Investors should carefully weigh their investment goals and risks before investing. Cryptocurrency is a digital value representation that acts as a means of exchange, account unit or store of value, but has no legal tender status. Cryptocurrencies are sometimes exchanged for US dollars or other currencies around the world, but they are not currently supported or supported by a government or central bank. Their value is derived entirely from market forces of supply and demand, and they are more volatile than traditional currencies. Trading cryptocurrencies carries significant risks, including volatile market price fluctuations or flash crashes, market manipulation and cybersecurity risks. In addition, cryptocurrency markets and exchanges are not regulated with the same controls or customer protection rules available in stocks, options, futures or foreign exchange investments. Cryptocurrency trading requires knowledge of cryptocurrency markets. In trying to profit from cryptocurrency trading, you need to compete with traders worldwide. You should have the appropriate knowledge and experience before engaging in a major cryptocurrency trading. Trading cryptocurrencies is generally not appropriate, especially for funds from retirement savings, student loans, mortgages, emergency funds or funds made available for other purposes. Cryptocurrency trading can lead to large and immediate financial losses. Under certain market conditions, it can be difficult or to liquidate a position quickly at a reasonable price. This can occur, for example, when the market for a particular cryptocurrency suddenly falls or when trading is stopped due to current news events, unusual trading activities, or changes in the underlying cryptocurrency system. Several federal agencies have Documents that surround the risks of virtual currency. For more information, see the CFPB's Consumer Advisory Service, CFTC Customer Advisory Service, the SEC's Investor Warning, and FINRA's Investor Warning.
