Micro-vu excel 501 hc

Excel 501 Automated Vision Measuring Machine. The machine can be widely used to measure PCBs, 3C products, seals, the automotive industry.. Etc. Can add Touch Probe, Laser and Rotary to the vision measuring machine to build a multisensitive measurement system. The Excel 501 measurement system implements new technologies to enable speed and accuracy on a reliable and affordable measuring machine. The system includes InSpec Metrology Software, Programmable Optical Zoom, 3x Digital Zoom, Non-Linear Stage Compensation, Non-Linear Optic Compensation, Advanced LED Lighting and Active Temperature Monitoring. InSpec Metrology Protection Software provides ease of point click, proprietary edge detection, advanced lighting control and calibration, multi-sensor integration, automated calibration, and clear display of metrics and tolerances. In addition to visual vision capabilities, Excel offers a touch probe and laser measurement capabilities. Touch probe capabilities improve 3D measurement capabilities. Laser capabilities improve scanning speed and Z height measurement. With multisensory capabilities, advanced digital and optical zoom, proprietary edge detection, and InSpec metrology software, Excel measuring centers can handle demanding measurement applications. The gantry style system can accommodate large parts and nodes of multiple parts while maintaining a relatively small footprint. The Excel series of machines measures parts up to 2.5 meters and weighs up to 100 kg. High-Res Vision System pruža živopisne slike s optičkim zumiranjem i trenutnim istinskim digitalnim zumiranjem za fini pregled. Napredna vlasnička kontrola pokreta osigurava mjerenje visoke točnosti bez ožiljka brzine mjerenja. Osjetljivi sustav sonde osjetljivog dodira koji omogućuje mjerenje manje zamršene geometrije. Brzi vertikalni senzori za mjerenje udaljenosti pružaju dosad neviđenu sposobnost skeniranja koja pokriva i spekularne i difuzorne dijelove. Sustav stila gantry može primiti velike dijelove i čvora više dijelova uz održavanje relativno malog otiska. Excel serija strojeva mjeri dijelove do 2,5 metra i težine do 100 kg.
