Crazy platform geometry games platform games are used to go to for gamers around the world. There was a time when they were the only digital games that people knew. The return of platform games in recent years has fueled more than just nostalgia - they really are tons of fun to play. Geometry Dash APK for Android is a prime example of platform games at its best - a game fun, addictive, challenging and simple enough for players of all ages. The added ability to unlock achievements, make your own level to challenge your friends, and customize your characters only makes the game even more enjoyable! On top of that, the gameplay is diverse and super-fun. You can jump over obstacles and then when you go through the ring, you will turn into a plane and you have to fly through all sorts of dangers - sometimes while upside down! Tips for playing Geometry Dash Geometry Dash APK is not an easy game. In fact, it's damn hard! You should pay attention to the following tips and tricks to make sure you are playing to the best of your ability. Sometimes you will have three or four platforms to jump one by one. Don't worry, you can just keep your finger on the screen to jump up all these platforms without the risk of missing them. It's worth noting if you see spikes coming up, you should stop holding the screen! Ignore uncomfortable coins like any platform game you want to try to collect coins as you go. This is like any platform game, there will be a few coins that are just out of the way. Don't worry trying to risk your level of collecting these coins. Try the practice mode This mode does not affect your level of progress and you can give up the markets to start with if you die. This is a very useful way to get to know how levels work. We certainly recommend using it if you are stuck on a certain type of obstacle. Use boosters There's no better way to gain an edge in the game than boosters. Some will allow you to jump higher, while others may time a little bit. All this is very convenient and will help you get a get Score... Not dying. Take breaks... We said it... You will probably burn your brain soon if you don't take frequent breaks. This game can get a little frustrating at times and taking regular breaks will allow you to avoid throwing your good new phone through the window and knocking out your neighbor in the process. Also, drink plenty of water to keep your focus on the upper levels. Geometry Dash Mod APK - Menu, Unlimited, All Unlocked... Play Geometry Dash Mod APK with Unlimited Everything!
