## WHAT IS IT

JETRO's Business Matching Program is a free service that gives North American companies direct access to nearly 200 prominent Japanese corporations.

## HOW IT WORKS

Companies submit their business proposal to JETRO, who shares it with Japanese companies seeking technology partnerships with North American businesses. Once a Japanese company expresses interest in a proposal, JETRO arranges an introductory meeting between both parties.

## WHO SHOULD APPLY

Any North American company that does not already have an exclusive business partner in Japan can apply.

## HOW TO APPLY

Talk to one of JETRO's Business Development members or contact JETRO online at <https://www.jetro.go.jp/usa/contact-us>. Once an inquiry has been submitted, a Business Development member will reach out to arrange a business consultation.

Talk to JETRO first.
