Borderlight Live Wallpaper is a personalization app that gives your mobile device fun and colorful boundaries. It picks up the edges of the screen, adding what appears to be dancing rainbow lights surrounding your device. Borderlight Live Wallpaper is customizable and is designed to fit the screen, no matter its size and shape. You can control how colors behaveApp offers different ways for your borders. When you open Borderlight Live Wallpaper, you can see which elements can be adjusted. The first menu is the wheel speed, which determines how frequent the colors change and how fast they flicker around the phone. You can set them at fast speeds like flashing Christmas lights, and you can also slow them down to a soothing effect. You can also adjust the border size to change the width of borders. You can make them thinner if you want colors less noticeable. Otherwise, adjust it to a thicker size. When it comes to the choice of a boundary radius, their adaptation simply melts the shape of the border with either sharp or rounded corners. This can fit any screen shape. Users can change the colors of the border even though the colors available are limited. Changing the wallpaper is also possible and you can change its visibility to your yet the funBorderlight Live Wallpaper really does do much more than add flickering lights to the screen, but it's undeniably fun and fun to watch. Live wallpaper can make your users' phone experience more enjoyable. If you find yourself just in egre life colors when they dance around the screen, that's perfectly normal. Download and share your experiences with us in the overview rating section - Border Light with hd live wallpaper. Wallpaper applications for Android allow us to customize our device for any wallpaper. And with many applications of this nature, we need to emphasize this Borderlight which can also be used to configure the colorful edge of our home screen and lock screen. Wallpaper with edge that changes its color with this app, we can set a multicolor screen border that changes cyclically. Its selection allows us to adjust the speed with which it changes, as well as the thickness of the edge. By default, the wallpaper is black, but we can apply any image found in the gallery. The interesting detail of this app and that we miss many others with the same style to customize the aspect of our Android, is that its developers have taken into account the limit that is becoming increasingly popular among smartphone manufacturers. Therefore, we can adjust the parameters of the colored edges to remember this function. Feature.
