Jupiterimages/Photos.com/Getty Images Oil Change in Hyundai Sonata is a simple task that must be performed every 3,000 miles. The oil provides grease and cooling of the engine components. The accumulation of heat can cause oil to lose its viscosity and break. When replacing the oil, you need to replace the oil filter. The old filter can contaminate the new oil and cause engine damage in the future. Make sure the car is parked on a flat surface. Place the drainage pan under the engine. Find an oil pan right under the engine. The oil pan will be at the bottom. Unscrew the drainage fork in front of the oil pan with the socket key. Allow all the oil to drain into the oil pan. Tighten the drainage fork back into the oil pan with a wrench. Find an oil filter in front of the engine. There will be a cutout in the protective shield where the oil filter is located. Unscrew the oil filter with a wrench. Allow the oil to drain into the oil pan. Place the old filter in with the oil waste. Spread the oil ball around the top of the new oil filter with your index finger. Fill the oil filter with fresh motor oil. Screw the filter on the filter case manually. Do not tighten the wrench, which could deprive the thread of the filter or filter housing. Open the hood to access the engine compartment. Unscrew the oil lid on top of the engine. Pour in three litres of motor oil. Pull the engine oil dipstick out of the tube dipstick and wipe it clean. Tap the dipstick back into the tube dipstick. Pull back and look at the level of motor oil. If the oil on the dipstick does not stop between the two marks on the dipstick, pour half a liter of oil and check the level again. Don't overcrowd. Start the car and let it run for five minutes. Turn off the car and check the oil level again. If necessary, add another half a litre of oil. Make sure the oil lid is back on the engine and the hood is closed. Always make sure the car is on a level surface so that the oil drains properly. Contact your local waste management company or auto parts store to remove oil waste and filter. Avoid overpayments with the following price services: CarsDirect MotorTrend Car Transactions With these services, you can: Make dealers compete for their business. Start your own online price war. Many prices are not advertised on the Internet. It's free and free. Visit Car Design, CarsDirect and MotorTrend. For many people, a midsize sedan is the most practical choice when it's time to buy a new car. The two solid contenders in this category are Hyundai Sonata and Honda Accord. Both are excellent in terms of efficiency and comfort, and some differences in performance, technology and convenience should be taken into account when making a decision. Powertrain Four of the five kits for the 2019 Hyundai Sonata are equipped with a 2.4-liter GDI four-cylinder engine. Capable of generating 185 horsepower and 178 pound-feet of torque, the engine is quite capable of giving the machine a bit of a kick while accelerating. It is paired with a six-speed automatic transmission that comes with SHIFTRONIC. SHIFTRONIC gives drivers the ability to manually want to feel like a car change stick. In addition, there is a choice of drive mode in which you can choose whether to maximize efficiency or power, or just keep things normal. Fuel economy on SE is estimated at 26/35 (city/highway) mpg. Although SEL, Sports, and Limited have the same engine, their fuel economy is estimated to be 25/33 mpg. At Sports, drivers can take advantage of paddle switches on the steering wheel. Sonata Limited 2.0T is a premium offer from Hyundai. Its two-twisted four-cylinder turbo engine and two-litre shift gets an impressive 245 horsepower and 260 pound-feet of torque. The trade-off when increasing power is slightly lower than efficiency, as this model gets an estimated 23/32 mpg. Instead of six-speed gearboxes that others, this model gets an eight-speed gearbox. Its paddle switches are conveniently positioned on the steering wheel and are fun to use. Hyundai Sonata uses four-wheel drive brakes, MacPherson front racks with coil springs and independent multi-family suspension at the rear. The wheels range from 16-inch alloys in the base model to 18-inch alloys in The Limited Turbo. A very similar suspension system is integrated in the 2019 Honda Accord. The Accord has ventilated front disc brakes and solid rear disc brakes, and some of the higher sets have power-enabled ventilated front brakes. Most Honda wheels are 17 alloy cars, but the sport has 19 alloy cars that have black inserts for extra style. The standard engine options in the Honda sedan are a 1.5T four-cylinder engine with 192 horsepower and 192 pound-feet of torque and a 2.0T four-cylinder engine with great capabilities, at 252 horsepower and 273 pound-feet of torque. These statistics are quite high and they are on par with the supercharged version of the Sonata. Another choice to choose from on the Accord is the hybrid engine system. It has a net 181 horsepower and 232 pound-feet of torque, not too shabby for an efficient system that can reach approximately 48 mpg. The 1.5T engine can get up to 30/38 mpg, and the 2.0T engine can get up to 22/32 mpg. There are still many options in Honda, and customization can be important for some customers. The 1.5T engine is usually paired with a continuously variable transmission, a 2.0T engine paired with a 10-speed automatic transmission, and in a sports finish, there is an opportunity to get either an automatic or manual transmission. Drivability Both cars have a sporty and stylish look, especially when considering what their predecessors were similar. Hyundai has a total passenger volume of 106.1 cubic feet, with 16.3 feet in the trunk. The legroom is pretty good for front passengers, at 45.5 inches. Taller passengers can feel a little cramped in the back as the legroom is 35.6 inches in lf extra storage space is needed, the rear seat can be folded in several different ways, as it is a 60/40 split bench. The trunk space in the Honda is slightly larger, providing 16.7 cubic feet of storage space. The total passenger capacity in the Agreement is 105.6 cubic feet. Comparing legroom, Accord offers slightly less space in the front, but more at the back. The legroom is 42.3 and 40.4 inches in front and back, respectively. All Accord finishes, with the exception of LX, have a 60/40 split bench. Power windows and door locks, adjustable steering wheels and double-lighting mirrors are standard elements found on the basic Sonata SE model. The SEL handle and change handle are wrapped in leather, while the steering wheel is a heated version. At this level, the driver's seat is powered compared to the manual, and both front seats are heated. Help with comfort on the SEL and above the dual automatic climate control system and vents designed for rear passengers. In Sonata Sport, a lot of style can be gained by adding tilt power and sliding hatch. It also helps in this department sports seats with leather bolsters, sports knob shifts, aluminum pedals, and 3D-tech accents in the cabin. In a limited seat finish, the seat is more luxurious in the skin, and the passenger seat becomes powered. The front seats are ventilated in addition to heating, and drivers can easily make adjustments using an integrated seat memory system and mirror positioning. One of the differences from Limited 2.0T is that it has leather sports seats. In Honda, there are also expected features such as power locks, power windows, internal lights, and training. Starting with the base LX model, the car gets a start button, a two-zone climate control and a 12V outlet. An advanced rearview mirror that can automatically dim when it detects bright lights and ambient lighting when the door is opened is some of the luxurious elements saved for higher finishes, like the Home Link Remote System, which is very similar to The Remote Hyundai program. In terms of seating, the Honda LX comes with manually adjustable driver's seat and fabric seats throughout. In sports and above, more updates are included. These finishes have adjustable powered driver seats and heated front seats. In ex-L and Touring finishes, drivers have two-point memory and all seats are trimmed with leather. Touring is the one that has the most decorations such as ventilated front seats and heated rear seats. Technology is always important to consider in modern vehicles. Sonata SE comes with a seven-inch touchscreen and six-speaker audio system in addition to the coveted Android Apple CarPlay and Bluetooth compatibility. These features can make a big difference in convenience when people do and get sending messages and playing your favorite music. At SEL, the next level up, the system includes the ability to play HD Radio and SiriusXM Satellite Radio. Other perks are wireless charging and the Blue Link Connected Car System. This package allows the driver to contact her or her car through a mobile device. Drivers can earn an engine, adjust the temperature, lock or unlock doors, find the location of the vehicle, and look at the vehicle's diagnosis. It's a powerful program for those who like to stay connected with technology. The next major upgrades are included in Hyundai's limited 2.0T trim. This touchscreen is enlarged to eight inches, and instead of the standard speaker system, it uses an Infinity premium audio system. There are a total of 10 speakers, as well as a subwoofer and a 400-watt external amplifier. This infotainment system comes with integrated navigation, which is useful when traffic is difficult to predict or someone is unfamiliar with city streets. In addition, the basic Accord comes with a simpler system with four speakers and a seven-inch WVGA screen. However, these cars have Bluetooth and Pandora radio capabilities. Only on sports and above the infotainment package is more comprehensive. At this level, there are eight speakers, an eight-inch high-resolution touchscreen, and Apple CarPlay and Android Auto integration. HD and SiriusXM Radio come standard, starting with EX. In EX-L, the sound system is amplified to a 450-watt premium system with 10 speakers and a subwoofer. In Touring, navigation integrates with a touchscreen, wireless charging is available, and the car can act as a Wi-Fi hotspot. Safety To ensure passenger safety, Hyundai includes a number of driver assistance features. Unfortunately, the package in the base SE model is finely limited. With that initial finish, the car gets a rear-view camera to provide drivers with the best prospects while they back up. SE also receives a blind spot detection system, a warning system that can notify drivers if there is a rear intersection while they are in the opposite direction, and assistance during lane changes regarding other vehicles on the way. Standard features such as anti-block brakes, traction control, and full dent dent are included on all models. In SEL and Sport trim, there is the option to include Lane Keep Assist and Emergency Braking, which can be dealt with if there is another vehicle or pedestrian on the way. On the limited, these two programs are standard, and there is an option to include rear parking sensors that can help in difficult parking situations. Also The finish has intelligent cruise control that can maintain proper distancing. This advanced cruise control is an option at SEL and Sports. Going for Honda, there are airbags, crumpled zones, and three-point seat belts that are always ready to keep to hold Safe. Honda has built all of its agreements with anti-lock brakes, stability control, and electronic brake distribution just like Hyundai did with their Sonatas. All Honda finishes have a collision mitigation braking system, warnings that may indicate the likelihood of front-line crashes, and a mitigation system that alerts drivers when they get out of the lane. These features are part of the Honda Sensing package. It also includes adaptive cruise control that even works at low speeds, a recognition system that can read road signs and display this information on the vehicle screen, and a corrective steering that will kick in gear to help the car stay in the center of the lane. Interestingly, the blind zone monitoring system, which includes a cross-traffic monitor, is only included in higher finishes. Which has the best value price is pretty competitive under the \$20,000 mark that many customers should remember, the 2019 Hyundai Sonata SE is worth \$19,900. SEL is offered at \$21,550, with the sport coming in at \$22,400. The highest finish with a standard engine is limited, and it has an MSRP of \$24,850. For premium performance with a turbocharged engine, expect to pay \$29,250 for a limited 2.0T. Honda is priced higher at \$23,720. The hybrid finish has AN MSRP of \$25,320, the sport costs \$26,180, and the EX starts out at \$27,620. EX-L and Touring have premium upgrades, and as such, they have higher price tags. MSRP EX-L is \$30,120, and touring starts at \$34,990. What's better are both of these cars doing well in many categories, including interior comfort, overall style, performance and safety. Honda Accord offers a little more value though, so if extra money can be spent, this might be a wise move. This is especially true if someone really appreciates efficiency and wants to drive a hybrid vehicle. At the same time, anyone who prioritizes availability in this match-up is likely to be more attracted to Hyundai Sonata. Sonata.
