This is one of those encyclopedic bachelor's textbooks that covers a lot of land. Its fourteen chapters cover myths and facts about the U.S. seniors (age, demographic profile of elders, ethnic elders), biological theories of aging, age-related changes, chronic diseases, acute diseases and accidents, drug use, mental health and disease, nutrition, physical activity and promotion of exercise, sexuality, medical I have just finished the second edition since 1993 - the current edition (2012) is the fifth. This is one of those encyclopedic bachelor's textbooks that covers a lot of land. Its fourteen chapters cover myths and facts about U.S. elders (age, demographic profile of elders, ethnic elders), biological theories of aging, age-related changes, chronic diseases, acute diseases and accidents, drug use, mental health and disease, nutrition, physical activity and promotion of exercise, sexuality, medical care, long-term care, death, death and grief. It includes text and photographic branches, and each chapter contains summaries, proposed student activities and bibliography. Ambitious undertakings, sometimes too short (about ten treatments for mental illness are sent on two pages, for example), sometimes it's easy to get lost in a mass of detail (do we really need to know about all kinds of vitamin B?), and on hand and on the hands of competing theories or recommendations, sometimes there are sterling common-sense recommendations. I found it an interesting book to dip into at leisure, but if I were a student, I wouldn't want to be quizzed on it, however, I would explore many of the activities on offer. Since the area of geriatrics and gerontology mushrooms in the U.S., not to mention Europe, I strongly recommend any reader to go straight to the latest edition of the book. ... more It was for my Aspects of Health in an aging class from Concordia, Seward. Health is such an important topic that we too often take it for granted until we lose it. And much can be done to improve our health, especially our health in later years. Much of what can be done involves exercise and diet, and many of us don't do a good job at it - the leader of the sinners, that is me! The book gives a complete package of health problems in many different aspects, although it does not cover This was for my Aspects of Health in an aging class from Concordia, Seward. Health is such an important topic that we too often take it for granted until we lose it. And there's a lot that can be done to our health, especially our health in later years. Much of what can be done involves exercise and diet, and many of us don't do a good job at it - the leader of the sinners, that is me! The book gives a complete package of health issues in many different aspects, although it does not cover the spiritual side hardly at all. This is not a religious textbook, but a secular textbook, and some of them can be viewed differently by Lutherans. But it's a good book and will be a continuous resource to get more information about medical subjects. ... More Is a tutorial ... so that's probably not your average fun read. But this class was all about the health of things that change with aging. My own parents are in a nursing home, my mother-in-law lives across the street and will be 80 this year and my husband is disabled. And... I'm almost 60 ... so I myself have experienced a lot of things discussed in this book. I found the whole book to be useful, easy to read and understand, well organized if I would like to see a specific thing and all AROU This tutorial ... so that's probably not your average fun read. But this class was all about the health of things that change with aging. My own parents are in a nursing home, my mother-in-law lives across the street and will be 80 this year and my husband is disabled. And... I'm almost 60 ... so I myself have experienced a lot of things discussed in this book. I found the whole book to be useful, easy to read and understand, well organized if I want to see a particular thing and all around enjoyable. The class was great and I'm really glad I got to take this book. ... More Page 2 Health in later years Textbooks (en) Buy textbooks Textbooks on Medicine Geriatrics and Gerontology Textbooks Summary Author Bio Table of Digital Health Rights Content in later years is designed for college students, both students and students, in various fields of study, especially those who are planning careers in health and human services. The text provides a comprehensive scientific approach to health-related topics affecting the elderly and those who care for them. Chapters are included that address the main impacts on the health of the elderly: demographics, chronic and acute diseases, mental health and disorders, the use of drugs, physical activity and nutrition, sexuality, health promotion, medical and long-term care, death and death, among others. The text contains a full human approach to health that includes sufficient attention to cultural differences, psychosocial, economic and cohorts.
