## Lead grabber pro

The 1 year LeadGrabber Pro service is B2B's lead generation software that uses B2B sales and marketing teams to create lists of potential customers from professional networking sites. LeadGrabber Pro is a B2B prospect list of building tools used by B2B sales and marketing professionals and leadgen team to create a list of potential customers from professional networking sites. The tool captures new contacts from online directories, as well as professional and social networks. LeadGrabber Pro extracts contact information from these websites with one click, including name, position, email address, company, phone, etc., and stores information in a spreadsheet format. However, contacts found on the Internet usually do not have email addresses or phone numbers. LeadGrabber Pro offers missing business email addresses and phone numbers, which speeds up exploration. The software finds this data through real-time searches on the Internet. LeadGrabber Pro directly transmits the B2B Salesforce, PCRecruiter (PCR), ACT1, Excel and Outlook perspectives. It also supports the CSV format for automatic contact exports to Bullhorn, Lotus Organizer, Jigsaw, etc. still spend money on lead generation methods that don't work? At last... Do a targeted search on LinkedIn, and it scans the Internet to find contact information. Cons: It has a pretty clunky interface, and won't work at first until their support guy is connected to my computer and installed some files. It felt a bit fishy ... but fortunately, the product works great now. Thanks Source: CapterraJune 8, 2018Likelihood RecommendSource: CapterraAugust 25, 2020Overall: Overall, we are pleased with LeadGrabber Pro. Despite the fact that the program is slow and does not Email addresses will be valid (25% may be guesses from the program), customer service is very good and they are very responsive. We can find contact information for business customers that we would otherwise not be able to find on our own. Pros: What I like most about LeadGrabber Pro is being able to find email addresses for leads that I wouldn't normally be able to find using other methods. You just need to company, website, contact name, and LinkedIn URL (so some research is required), but the program does the rest with the app's email address, and even a phone number if necessary. Customer service is also unparalleled. They are very responsive, friendly and competent if necessary. Cons: What I like least about LeadGrabber Pro is the length of time it takes to run. It will take a couple of minutes for the lead, which can really add up if you find leads in a long list. Many times, I need to have the program running on the night or on weekends to complete the list uploaded. The time varies depending on the contact record, but I would say that it usually takes 1-2 minutes per lead. Being an entrepreneur and start-up business that really was more than I could pay with my advertising budget, but I'll keep that in mind when my ever budget sizeSource: CapterraJuly 16, 2018 2018
