It is the first Final Fantasy online, although other games Amaranth Coral Alexandria It is a dark and stormy night, as we see a small boat/raft thrown through the waves and two people clinging inside the small boat. As we have two quick glimpses of their faces, it turns out that it was all a dream. A young woman, adorned with a fancy dress and what looks like a crown, looks out of the showing the kingdom of Alexandria. A ship will approach and the game is cut into the ship, where a young man with a tail slides down a pole. He walks through a door and enters a dark room, lighting something to shed a faint glow. It is at this point that you gain control of this young man, with his goal of lighting the candle in the center of the room, at the table. Leave that right now and let's explore this room for two treats. Trophy/Missable Achievement: There is a trophy/achievement in the game, called Another Man's Treasure, which requires you to reach rank S as a treasure hunter. To do this, find items in the field, give them to you, open chests, and another method that will be described below. To reach rank S, you need 340 points and you only get one point from the above, with two points awarded by the other method. 12(1 of 2) An exclamation mark means you can interact with somethingAn exclamation point means you can interact with something (left), such as finding items that have just been put around (right) in the upper right corner of the room, you should see a pop-up exclamation point, which means there is an element to be discovered or you can talk to a NPC. Since the latter is not there, that means there is an element. The item in the top right corner will be a mesin potion, which may not seem important now, but saves you money for other things. There will be one more element in the upper left corner, which will be 47 Gil, so grab it and light the candle on the table in the center of the room. This will lead you to name the main character, but this guide will use its default name, Zidane. After a quick little scene, you'll be pushed into your first battle. The fight in FFXIX Final Fantasy IX uses the Active Time Battle System (ATB), where a bar will be filled next to the character's HP/MP at the bottom of the screen. Once it's full, the list of commands will open and you'll be able to choose an action. Most of these options are self-explanated, except Change, which only changes your character from the first row to the back row (and vice versa). The battle against the Masked Man is nothing special, as the damage is minimal and there is even a chance that he will stumble and do nothing for a turn. Actually, you don't even need to win the battle, as you can take down your own characters and advance in the plot. Either way, there's something important you want to do in this battle, which is steal from the Masked Man. Unlike previous entries in the series, enemies of this game can steal their multiple items, although there is still the typical rarity of items. If they have objects in all four slots, the common object is usually a theft of the with the rare object being 25%, the rare one is 6.25% and the very rare being a misly 0.39% probability. The Masked Masked it has items in the first three slots, which are a potion, doll and a Masher mage. The last element is the one you want, so keep stealing with all four characters until you get it. 12(1 of 2) Enemies can have multiple items to stealEnemies can have several items to steal (left). You want to make sure you get the masked man's mage Masher (right) Don't worry if Cinna or other characters perish in the process, as it has already been mentioned that you don't need to survive this fight. After stealing the Masher Wizard, you can simply spam the Attack command to take down the Masked Man. The game will take over once the battle is over, with you have to give an answer at some point (hijack Princess Garnet), then the game will take you to the city of Alexandria. That's the only negative thing, you have to stop playing and visit PlayOnline to find it all. It's true, you don't have to pay for it as you get the passwords in the book, but still take the time, when you might be sitting in front of the TV with the book in your hand. Other than that, this book is good. All cards, weapons, monsters (including XP), small secrets, etc. Nice design, with maps for each area next to the area area on the walkthrough, not on the back (no more flipping back and forth).
