Perovskite Chemist (Santa Clara, CA)

Tandem PV is a leading developer of high-efficiency thin-film solar cells and modules using metal-halide perovskites in tandem configurations. TPV is scaling perovskite technology that combines exceptional product performance and durability. The company has demonstrated efficient durable cells, monolithic multi-cell submodules and packaged modules using scalable low-cost processing on R&D size samples, and is transitioning to product-size pilot development by expanding its team, acquiring production-style tools, and building out a pilot manufacturing facility. We are looking for a **Perovskite Chemist** to improve our technology at the R&D stage as we take the next steps to commercial products.

Role / Responsibilities

- Develop perovskite inks, including compositions, solvents, and transient and permanent additives
- Develop quality control and assurance for perovskite inks
- Develop ink handling, storage, and shelf-life specifications
- Identify new research and development opportunities
- Work with engineers and technicians to implement new inks and engage in feedback for process development.
- Perform chemical and solar photovoltaic metrology and analyze and interpret results
- Develop project plans and experimental designs

Qualifications

- Require previous relevant academic or industry experience with ink chemistry
- Desire previous experience with halide perovskite ink chemistry
- Desire previous experience with design of halide perovskite inks for scalable deposition
- Hands-on lab skills and knowledge of safety in a wet chemistry environment and safe use of hazardous materials
- Imaginative and systematic approaches to problem solving
- Excellent verbal and written communication skills
- Require university degree in Engineering, Science, Chemistry, or related fields. Prefer advanced degree in relevant field
- Applicants must be currently authorized to work in the United States for any employer

Who we are:

- Tandem PV aims to use perovskite/silicon mechanically-stacked tandems to upgrade silicon solar panels, sharply decreasing installed systems costs, significantly increasing module manufacturing profit margins, and opening up vast new solar markets in the US and worldwide.
- TPV was co-founded by Stanford PhDs Colin Bailie and Chris Eberspacher; is advised by industry experts from Corning, First Solar, Vivint Solar, and Kateeva; has raised \$3M in private funding; and has been awarded \$8M in R&D grants from the Department of Energy, California Energy Commission, etc.
- TPV is raising >\$10M Series A equity investment for Pilot production engineering, tools and facilities
- Tandem PV is a diverse, equal opportunity employer. All qualified applicants are encouraged to apply.
- Salary, benefits and equity upside commensurate with experience and with Silicon Valley advanced materials start-up culture.

Timeline: Tandem PV is looking to fill this position immediately. Contact info@tandempv.com to learn more
