The album, released on February 2, 1994, saw the band move on to a more affordable rock sound than their more lo-fi debut Slanted and Enchanted and achieve moderate success with the single Your Cut Hair. The album also saw original drummer Gary Young replaced by Steve West. It was a hit UK Top 20 after release, although it was not so successful in the US charts. By 2009, the album sold nearly 500,000 copies. He concluded that the album was a bright, dynamic, emotionally resonant album that stands as a touchstone of underground rock in the 90s and one of the great albums of its decade. Robert Christgau of Village Voice gave the album an A rating, describing it as a tour de force melodywise. David Browne of Entertainment Weekly gave the album B, writing, Crooked Rain, Crooked Rain is just a bunch of guys living on topics like skateboarding, plane crashes, girls and mocking Stone Temple Pilots. When they set these feelings on bumpy road drones or a little country lilt... The result has a subtle, ingratiating beauty. Los Angeles Times critic Richard Crothyn gave the album 3.5 out of 4 stars. Cromelin wrote that the album contains some of the loopiness of meat dolls, the resonance of folk-country stones/burritos, and the chirpy tunefulness of pop -- along with enough opposite abrasiveness to keep you from getting too comfortable with them. In 2003, Legacy ranked 210th on Rolling Stone magazine's list of the 500 greatest albums of all, and 212 in 2012. It also ranked 10th on its best albums of the nineties. In 2003, he was ranked 8th on the list the best albums of the 1990s, and in 2010 the song Gold Soundz was included in the number one list in Pitchfork's 200 Greatest Greatest Album In July 2014, Guitar World was ranked 21st on the Superunknown: 50 Iconic Albums list, which ranked 1994 at number 21. The photo in the middle of the cover was taken from the March issue of National Geographic magazine in March 1978. The album was also included in the book 1001 Albums that you should hear before you die. The album was re-released on October 26, 2004 by Matador Records under the title Crooked Rain, Crooked Rain: LA's Desert Origins. The rabble-roused version contains two discs: the first is the original album, as well as the B-sides and a collection of tracks of that era. The second disc is a collection of previously unreleased tracks featuring former drummer Gary Young and live BBC Sessions. The collection includes forty-nine tracks taken from various previous records, including the original album, the single Cut Your Hair, Range Life, Gold Soundz, Gold Soundz Australia-N.S. Fillmore Jive 6:38 - Due to a splash of ink on the back of the original artwork, the song Silence Kid became mistakenly known as Silence Kit. This wrong decision persisted when designer Mark Ohe printed it on the back of a reissue of Crooked Rain, Crooked Rain: Desert-Born Los Angeles, despite the interior art showing the correct name in print several times, including written in Stephen Malkmus's own handwriting. Since its original naming, however, it seems that the band also refers to the song as Silence Kit in the set list, as well. Staff credits adapted from the notes of the album liner. The error persisted even after designer Mark Ohe revised the cover for The Crooked Rain Special Crossing Of The Rain (Crooked Rain, Crooked Rain: Desert-Born Los Angeles). Although the title of the song is correct in the inner art of the cover, the band seems to have taken over the title of the song as Silence Kit, as already found in the set list.
