Although the goal is the same as the other level ingredients, the number of ingredients as well as the limited number of moves make this level more challenging than it looks. The ingredients on the outer columns are those that are particularly difficult to get down. The point goal at level 17 should not really be a problem, so don't focus too much on that particular goal. Here are some tips that should come in handy in finishing this level. Quick Guide Tips #1 - Where to Focus Your Moves Tips #2 - What Special Candies Are Best Tips #3 - Goals for Each Move Comments - Leave a comment if you're stuck and I'll try to help. Purpose: Bring down 4 ingredients and get at least 40,000 points. Draw: 19 Stars: 1 star = 40,000 points; 2 stars = 50,000 points; 3 stars = 60,000 points Tip #1: When given the chance, try to get cherries on the outer columns towards the center, as it is easier to bring them to the bottom of the board if they are in the middle columns. The shape of the board makes it difficult to get down ingredients on the periphery, so start by bringing them down first to make this level much easier for you. Back to Top Tip #2: Just like most levels that require you to bring down the ingredients, the vertical striped candies would be very handy at this level. The wide board makes it easier for you to find candy combinations to create striped candy, even though there are 5 types of candy on the board. Make sure you activate the vertical striped candy when it is in the same column as an ingredient. You may also create horizontal striped cans and it down to the bottom of the board, so you can easily drop the ingredients near the bottom of the grate. Combining striped canines with wrapped canines can also do wonders for you in this level. Popular: The 14 Candy Crush Saga Cheats & Tips Experts don't want you to learn.
