If you're like me, then you're on the fifth day of playing Taylor Swift's 1989 album as it goes out of fashion. (Look what I did there, Swifts?) In almost every song on the album, which is rumored to be about her ex-boyfriend Harry Styles, Swift makes references to Stiles's green eyes. The boy band member has eyes that look green in some lights and blue in others, but overall she (and all of us) seems fascinated by their green color more than anything else. You know who else has green eyes? Harry Potter. And the more I thought about it, the more I began to realize that Styles and Harry Potter were actually the same person. In fact, if the styling is ever looking for a Halloween costume, then he might want to try the boy wizard on size. Sorry, you might say. But Stiles is not an orphan with a scar, which is constantly on the run from the dark wizard. And to which I replied: Fair enough. But if you look at the evidence, Styles and Potter have much more in common than just both British (although that's a consideration). In fact, I have nine compelling evidence that two Harrys are more similar than you might think.1 They're both British. Accent? Accent? Sure, their accents are from two different parts of England, but I'm willing to ignore that if you.2 They both have green eyes. Just ask Taylor Swift. Of course, Daniel Radcliffe's eyes weren't green in the movies, but there were a lot of glaring missteps in these films. Let it go like Elsa from Frozen.3 Look at their hair. The defense is quiet. Oh, what, do you still need more? Ok... 4. They are both known to the awkwardness. In the sixth film, Harry Potter's external fame began to gain popularity in school, and Romilda Vane almost slipped on a love potion. Two weeks ago, Harry Styles threw on the side of the road and a fan turned the place into a sanctuary while another fan tried to sell his alleged vomit on eBay. Yes. Awkward.5. They make friends in bizarre ways. According to Stiles, he and his bandmate Louis Tomlinson first met in the bathroom. Harry Potter cemented his friendship with Ron Weasley (and began his friendship with Hermione Granger) in the bathroom. Coincidence? At this point, I think no. They both have friends who are family. Styles and other members of One Direction are all like family to each other. This is just to be expected, given how much time they spend together, on and off the road. Meanwhile, Harry Potter not only turned these elected members of Dumbledore's army into his little mini-family, but ended up being linked to three of them through marriage (Ron, Jeannie and Hermione, in case you're interested).7 They both reconciled with their exes. Both Style and Harry Potter had a romance that crashed and burned out, and they both gave Swift and Cho Chang respectively space after that. However, they both eventually managed to get back to being on good terms with their ex, even if they didn't hang out much after the relationship.8 They both hate the tabloids. Well, well, none of Harry specifically said they hate the tabloids. However, there are a lot of crazy stories written about them (see the point about them both being known), so I have no problem imagining that the media is not always their friend. Especially the media who don't care about the truth.9 They both have movies about their lives. I mean, I firmly believe that the Harry Potter movies were better than One Direction: This Is Us, but that's probably because one was an actual movie and the other was more like a documentary. Either way, if you want to learn about Harry Potter or Harry Styles, then there is a movie that you can rent to do so. You know why? Because they're the same person. Created: I am French and grew up in France, mostly without friends. I always loved reading, and when I was about 9 years old I discovered Harry Potter. I immediately loved him, obviously. I read the first three books on the loop and then excitedly read the fourth when it came out. After that, I realized that it took months and months for the new books to translate into French after they had been published in English, and I found this unacceptable. My English was OK but not great - I was, after all, 11 - so I decided to train myself. Given that I knew the first four books by heart, I realized that reading them repeatedly in English would help. I badger my parents until they ordered the English version from Amazon, and did just that. When the Order of the Phoenix came out, I immediately ordered it in English, and realized that I basically understood it. I kept reading other books in English, and eventually I became fluent. By the time I was 16 and I had to look at my university options, I decided to try and get to university in London. I had rubbish grades in my undergraduate but got a 19/20 in English which gave me an OK class overall. I got an offer from BuzzFeed Daily Newsletter! To say that the Harry Potter series is popular, to put it mildly. Books and films are a phenomenon of world pop culture. While most people, especially fans, probably don't question it, some may wonder: why is Harry Potter so popular? We'll study readers for the popularity of the series, and why it has endured so long. Trends come and go, after all. Yet Harry Potter seems to be enduring. Why? What does is Potter so popular? What is the secret of Harry Potter's success? First of all, J.K. Rowling deserves great praise for creating such a beautiful world in the first place. Without it, Harry Potter wouldn't exist. Second, the films deserve credit for basically sticking to the story in the books and for introducing Harry's story to a wider audience. However, all this fully explains the popularity of Harry Potter, why the story has taken off so much. So let's get into it. Harry Potter is partly popular thanks to J.K. Rowling's brilliant writing and screenwriters for the films. Another factor in his popularity is that he portrays his main character as a search and eventually embraces power. It's that adolescence, and in fact life, is all about. In other words, Harry Potter is popular because people can relate to it. While this comes in a fantasy setting, the problems that Harry deals with are all too human. The genre simply reveals these questions. What are some of the other secrets to the success of the series? According to Hank Green, author of the 2018 novel The Absolutely Wonderful Thing and Channel 2 Vlogbrothers on Youtube, Harry Potter is popular because of its relationship. Harry and his friends give readers the hard, strong and close relationship that all human beings crave. While Harry's story appeals to children, her influence on adults lies too much in this relationship. According to Greene, many adults long these simple, undeniable, childish relationships, and if they can't find them in real life, feel fulfilled after seeing them in the Harry Potter series. Harry's strength lies in friends, love, community. This message resonates with many fans of all ages. Why did Harry Potter last so long? We won't spend too much time on it, but we think there's something to be said for Harry Potter lasting as long as it has. And perhaps the reason for this lies in its power to unite people. Harry Potter owes its stamina to unlikely alliances. These unions include adults and children and readers and non-readers, groups of people who seem to naturally fear each other but unite for a mutual love for the series. Harry Potter also lasts so long because so many people have grown up with Harry. By doing so, Rowling fans for life for the boy master, the master, most likely to pass love on to everyone they possibly can. Another reason for Harry Potter's longevity is that the series has a positive effect on people. Many are inspired by Harry to discuss religion and community and perhaps ways to make the world a better place and a better Muggle. Harry Potter is popular and likely to remain so, at least if fans have something to say about it. The messages of the series will continue to inspire people around the world. And perhaps by loving Harry Potter, we'll all be inspired to become better people. The Wizarding World of Harry Potter opened at Universal Studios Orlando on June 18, and the studio reports an increase in attendance and attendance. This is particularly important because Universal theme park attendance has been hit by the global recession and slowing travel. The unveiling of the new attraction was a welcome event for Universal and Harry Potter fans, so news of the positive performance brings a welcome sigh of relief for Universal's hefty \$250 million bid when they went after the Harry Potter attraction and scooped it out from under Disney, which resides just a few miles away. While things look great with Harry Potter and the investment Universal has made, skeptics have been wondering aloud if Harry Potter really has a leg up for years to come, after the last movie comes out. After all, J.K. Rowling said she won't write any more Potter books, and she certainly has enough money (Forbes estimates her net worth at more than \$1 billion) to make this statement believable. First, it will be a very long time before all Harry Potter fans even get the opportunity to go to the attraction. By then, many of the readers will have more of their children in the age of reading and turned into Harry Potter fans. And at some point, the books move on to the next generation. Also, just because J.K. Rowling doesn't want to write more books doesn't mean she won't license various forms of Harry Potter adventure, from cartoons to video games. All this brand continuity depends on Universal, which has both the burden and the ability to make the Harry Potter brand stay fresh and make its product line continue to flow. The lesson in all this is for us to remember that we too need to be vigilant with our own brands and work to keep them fresh with new ideas and expanding products that not only grow in numbers, but also lead to new verticals of business and opportunity. Like Universal, most of us have invested a lot of time and money to build our brand and in doing so have secured a bit of intellectual property that we have that is unique. While our brand may not matter to Harry Potter, it does not have to opportunity to create more jobs, economic growth contribution, and a good nest egg for yourself Family. It's a bit of Wizard magic in itself.
