TIST NEWSLETTER SEPTEMBER 2020

TIST Cluster servant Santizing the farmer before  
proceeding for Grove Visit

Cluster Servant Ensuring Putting On Face Mask & Santize as a means of preventing the spread of covid -19

**The TREE** is a monthly newsletter Published by **TIST** Uganda, a project area of **The International Small Group** and **Tree Planting Program**.

**MISSION STATEMENT:**

TIST Uganda is a community initiative dedicated to empowering small groups of subsistence farmers to combat the devastating effects of deforestation, poverty and drought.

**OBJECTIVE STATEMENT:**

Combining sustainable development with carbon sequestration, TIST supports the reforestation efforts of over 25,000 subsistence farmers. Sales of carbon credits generate participant income while TIST today also addresses Agriculture, HIV/AIDS, Nutrition and Fuel Wood challenges.

**ADDRESS:**

*TIST Uganda.  
 Bushenyi Town, Liberation Road - Kitokye Lane  
 P.O. Box 232, Bushenyi,  
 Uganda, East Africa. Tel: 0772 058 868 / 0773 716960 / 0772360429 / 0783910878  
 Website: [www.tist.org](http://www.tist.org), [info@i4ei.org](mailto:info@i4ei.org)*

**TIST ANSWER DESK - 0785 - 322715**

**IN THIS ISSUE:**

- ADVANTAGES OF DIFFERENT TREES SPECIES
- WHY TREES MATTER
- CONSERVATION FARMING
- BENEFITS OF CONSERVATION FARMING
- TIST PROFIT SHARING INFORMATION
- HEALTH AND SAFETY DURING COVID-19

 Kiswahili..... 6

### ENGLISH

#### ADVANTAGES OF DIFFERENT TREES SPECIES

It is important to plant trees but more important to plant different tree species, collecting the seeds that are locally available, which are friendly to the environment in our localities.

After collecting different tree seeds, you ought to start your own/SG nursery, to have many seeds at a low cost.

Growing different tree species helps you have them play different roles i.e

Nutrition

Disease outbreak

Market differences when time for harvesting

Some trees can be planted around gardens & carbon

Medicine

Growth rate

Resistance to drought

Government policies

Tourist attraction

*By Ainebyona Chrisostom-Quantifier Kanungu*

#### WHY TREES MATTER

TREES are on the front lines of our changing climate. And when the oldest trees in the world suddenly start dying, it's time to pay attention.

Now it's time to pay attention, my fellow colleagues of TIST farmers. Let's plant more trees, to safeguard our environment and the world at large.

#### CONSERVATION FARMING

Conservation Farming mainly focuses on use of locally available soil nutrients, enhancing resources such as animals and plant residues.

Conservation Farming is done by making perma-

nent planting stations, or basins.

Basins are made by hand, using trees following standards of depth, width and length.

#### BENEFITS OF CONSERVATION FARMING

It reduces air and water pollution

Time saving and thus reduction of labor and requirements

Higher efficiencies in the sense of more output from a lower input

Reduction costs - e.g. fuel, machinery operating costs and maintenance, as well as reduced labor costs

*By: Okello Francis –Quantifier –Gulu*

#### TIST PROFIT SHARING INFORMATION

Let's talk about Profit Sharing with TIST. With TIST, farmers receive 70% of the profits that TIST creates each year from selling carbon. Farmers receive a share of the profits based on their work planting trees.

Profit sharing happens each year. It is based on the amount of tonnes that a Small Group has captured in their trees, and how much money the program made in profits.

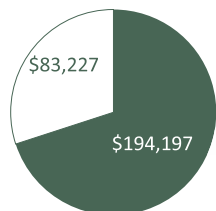

**Profits = Revenue – Expenses**

**HEALTH AND SAFETY DURING COVID-19**

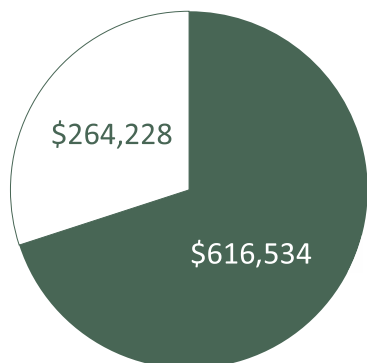

*TIST encourages farmers to follow best practices including and above what the government requires*

- **Do not ride matatus or boda bodas**
- **Wear face masks**
- **Do not shake hands**
- **Practice social distancing of at least 1.5 meters**
- **Do not meet in groups**

■ Farmer's Profits  
□ TIST's Profits

2018	Kenya and Uganda	2019
\$194,197	Profit Share (USD)	\$616,534
3,355	Small Groups	9,372
2,367,482	Tonnes	5,349,310

■ Farmer's Profits □ TIST's Profits

**How Does my Small Group Become Eligible for Profit Sharing Payments?**

Signed GHG Contract

Quantified Within 9 Months

All Baseline Information Collected

From 2018 to 2019, TIST made much larger profits. Based on sales we have already made for 2020, we expect to have even larger profits in 2020! These profits are the result of hard work by TIST farmers, Cluster Servants, and leadership.

A Small Group's profit share is calculated based on the total tonnes they had in 2019, and the profits made in 2019. Next year's profits will be based on the total tonnes the Small Group has in 2020, and the total profits made in 2020.

***Please ask your Cluster Servant if any of these are confusing to you.***

### RECEIVING PAYMENTS DURING COVID-19

- TIST tonnes are known for their accuracy and for the benefit farmers create by sharing best practices to improve their farms.
- With COVID-19, Cluster Servants are not able to travel between many Clusters. We are starting with Clusters where the Cluster Servant can walk or ride a bicycle. These Clusters will be the first ones to receive payments.
- In order to better serve the farmers, we need more Cluster Servants who live near to their Clusters.

### TIST IS HIRING NEW CLUSTER SERVANTS

## SAFETY MEASURES

TIST wants all of the farmers, Cluster Servants, and communities to stay healthy and safe. While Cluster Servants are staying in the Cluster close to their home they will:

- Wear a mask when speaking to anyone or near anyone
- Maintain a distance greater than 1.5M
- Use gloves or sanitizer when handling any paperwork or other materials
- Travel by foot or bicycle (NOT matatu or hired boda boda)
- Avoid any groups of people

### OMUGASHO GW'OKUHINGA EBIKA BINGI BY'EMITI

Nikirungi kubyara ebika bingi byemiti obwe orikwiha ensigo zemiti omubyanga byaitu ahakuba niziba ziine obuzaare nebyanga byaitu.

Waabona ensigo ezi, oshemereire kutandikaho nasare eyaawe kandi obwe ensigo oziguzire aha sente nkye.

Okuhinga ebika bingi by'emiti kiine emigasho nkegi;

Ebyokurya

Okutangira endwara

Obutare bwingi

Emibazi

Neekura gye

Neegumira ekyanda

**FAIDA YA AINA YA MTII MBALIMBALI.**

Ni muhimu kupanda mtii lakini zaidi, nii ya muhimu kupanda aina ya mtii mbalimbali, kama tuna saanya mbegu ya kawaida iliyo patikaana haraka, ambayo ni rafiki ya mazingira katika maeneo yeetu.

Baada ya kusanya mbegu ya mtii mbalimbali, nilazima uwanzishe kitanda ya kitalu yaako (SG Nursery) ndiyo ukue na mbegu mengi ya gharama ya chiini.

Kumeasha Aina ya mtii

Mbalimbali ina kusaidia kucheza jukumu mbalimbali saasa:-

- Lishe
  - Kuzuka kwa ugonjwa
  - Soko tofauti wakati wa makumo
  - Mtii engine naweza kupandwa karibu ya Bustani na kaboni (matumizi ya kemikali).
  - Dawa
  - Kiwango cha ukuaji
  - Upinzani kwa ukame
  - Sera ya serikali
- Kivutio ya utalii

Na.Ainebyona Chrisostom - kwantifaya - wilayawa Kanungu

**KWANINIJAMBOLAMTII?**

Mtii ina tangulishwa mbele kwa mabadiliko ya haliya hewa. Na kama mtii za zamani kale kwa

dunia ikianza kufa, nii wakati ya kia makiini.

Sasa nii wakati ya kua makiini, wenziangu wa mkuloma wa TIST .sasa tupandeni mtii mengi, kwa

jili ya ku Linda mazingira yetu na dunia yote.

**UHIFADHI YA ULIMAJI**

Uhifadhi ya Ulimaji haasa imetazaamia kwa Kutu-

mia madini ya kawaida iliyo patikaana kwa haraka, kuimarisha rasilimali Sasa mnyama na mabaki ya mimea.

Uhifadhi ya Ulimaji ina fanyikana na kituo cha kupanda ya kudumu, au kwa Bonde.

Ma Bonde ina fanyiwa ma mkono, tukitumia mtii na-kufatilia kiwangu yakima, upana na urefu.

**FAIDA ZA UHIFADHI YA ULIMAJI.**

- Ina punguza hewa mbaya na uchafuzi wa maji kwa mazingira.
- Ina uokoa wakati na kupunza kazi na mahitaji.
- ufanisi ya juu katika maana ya pato zaidi kutoka chini ya pembejeo.
- kupunguza gharama Sasa:- mafuta, gharama ya uendeshaji ya mashine na matengenezo, kama

kupunza gharama ya kazi vizuri.

Na: Okello Francis – kwantifaya wilaya wa–Gulu.
