Sorry guys, it's been a long, long time since I posted any updates on any builds to this little bloggerino. Unfortunately, I've been terribly busy with work, and I find less and less time to either build (which is totally damn depressing) or even write about it. Anyway I hope to resolve this situation in the coming weeks - with a few builds close to completion, I really wanted to share the results with you all. Anyway, today's post concerns the Jazz Bass build, which recently changed its color to Surf Green and got a few layers of acrylic clear. It looks pretty good, I dare say, and while the clear coat treatment, I finally took some time to form a headpiece and the sand neck smooth. The standard Fender Jazz Bass headgear template. I managed to find a bunch of Fender bass headstock templates on the TDPRI website, and hoped they would be enough to seal the deal. I decided on a stock standard jazz bass template and printed PDF 100% scale. The problem was, the pattern (as usual) didn't really match the headgear empty from the factory. Eventually I had to use a pattern to mark the circular end of the headgear and then just free hand a curved fin along the bottom. Not exactly a problem - even with my crappy drawing skills there's nothing strap dander and drum dander can't fix it right? Right. Anyway, the stars seemed to align, the jig saw made as it was said, and even grinding the disc and slap the wheels did not burn out the edges. Sweet with a headgear shape, I polished my neck to 360 sand and lifted the grains several times with water before staining. This time I went for a weak solution to Colortone Vintage Amber (I love these vintage tones) and made 3 passes in quick succession in an attempt to pop as much of the grain on this beautifully looking maple neck as I could. Headdress form, Vintage Amber is applied and the 1st layer of Tru-Oil. Once the dye was dry, he was on with the first dunk of the Tru-Oil coat and the maple just drank it. Dude, I can already see that the grain on that neck is really going to pop when the oil gets there. About 10 more coats or so go, so grasshopper patience, patience. Printed Guitar Pattern Pdf Telecaster Guitar Forum, fender - Tele Bass Headstock Template is one of the cliparts about guitar clipart, guitar clipart black and white, acoustic guitar clipart. This clipart image is a transparent background and FORMAT PNG. You can download (2000x2828) Printed Guitar Pattern Pdf Telecaster Guitar Forum, fender - Tele Bass Headstock template png music clip art for free. It's high quality and easy to use.
