

Pharmaceutical Program for Scheduled I-V

This program is intended to offer an easy and simple solution for destruction of your unwanted Non-Hazardous Pharmaceuticals for healthcare, pharmaceutical, government, and research industries for Scheduled I-V.

How it Works in 9 Simple Steps

You purchase a bucket from Trilogy for the scheduled pharmaceutical waste

Trilogy will then send you a box with everything you need in it

You will receive the box and all your supplies

You keep your bucket and box until it is full

ONCE YOUR PHARMACEUTICAL BUCKET IS FULL

Verify and inventory all scheduled products being sent for destruction. Send the completed Inventory Form to Trilogy MedWaste via email MailBack@trilogymedwaste.com. Once Trilogy has reviewed your Inventory Form we will respond to your fax/email with directions on how to proceed with your order. If your Inventory contains Schedule II items a DEA 222 Form will be sent to you via UPS. Place products in shipping container. Be sure to take extra care while packaging glass items, no loose pills and be sure to have your items packaged neatly.

You then use all the included supplies to package it back up for shipment

Go online and set up our UPS pickup

Trilogy receives the box from UPS then verifies the Inventory that is in the bucket against the Inventory Form that you sent in. Your Items are then stored in our vault until the next scheduled destruction date.

Trilogy witnesses the destruction and then sends you a Certificate of Destruction
