**REVIVE**

SHOWER HEAD & HOSE SYSTEM

H2OiQ REVIVE Antimicrobial Shower Head & Hose implement a quarterly replacement & recycling system which exceeds HTM 04-01 & L8. This system provides brand new shower heads & hoses delivered each quarter as replacements whilst collecting the old units for recycling. This negates the time consuming process of cleaning the old shower heads and hoses.

### INTRODUCING THE REVIVE RANGE:

1. New quarterly specific colour coded antimicrobial disposable shower heads & hoses delivered
2. Old coloured heads & hoses removed & packed in returns boxes
3. New colour shower heads & hoses fitted by maintenance staff at the start of every quarter
4. Pick up of previous quarter's old colour shower heads & hoses
5. Destruction and 100% recycling of old shower heads & hoses

- + Improved safety & infection control
- + Cheaper than cleaning on site and guaranteed to be clean
- + Quicker than cleaning on site
- + Fresh & new shower head & hose each quarter
- + Reduced management requirement
- + Reduced demand on your maintenance staff
- + Simple auditing & compliance management
- + Exceeding HTM 04-01 & L8
- + Cheaper than you think
- + 70,000+ shower heads already used in NHS Trusts across the UK

Protects 24/7  
against bacteria and  
viruses including:

+MRSA  
+E.Coli  
+Salmonella  
+Pseudomona  
+Legionella  
+Mould  
+Fungi  
+& more

New HTM 04-01 & L8 compliance is a necessary but expensive, time consuming drain on management time & maintenance resources.
