fat-free shredder will shred more than 200 sheets, while the heavier 12 lb. fat-free shredder shreds about 50 sheets of paper. Since the shredder is made from the same polymers and plastic as the rollers, it is easy to clean. If you try to shred multiple items with the same shredder, you'll notice it may shred more or less than you expected. A thick woven mesh is used on the underside of the cutting edges. paper shredder Since we now have a drive way to shred paper here in our new house, I have had to learn how to shred! I have been working for a while now and if I would put my shoe boxes of papers in the drive way, they would never get shredded. I could put them on a counter and shred there, but they would never be off the counter by the time I need to shred them. Now I have found a shredder that will work on the floor and that I can put right into my guest room. It is a no-frills version of this shredder. It works very well. It is easy to use and no matter what I do to this shredder, it will not mess it up. It shreds very fast and the biggest problem I had with it was getting the plastic box off the rollers. This shredder will shred up to 50 sheets a roll. It has a big shredding deck and the cutting blades are made from a special all-steel construction. The shredder is easy to use and maintain. I highly recommend it. I had to order it from Amazon because it is not a local store but it is worth it. Great product and cheap for the value. I had to attach the rollers to the spindles, but that was an easy fix. I had two of the "boring" versions of this shredder before and this is by far the best one I have owned. This is a great shredder. I needed something small, quiet, and yet shreds. I couldn't find any cheap option that did all of this. This product does just that. It is small enough to be tucked away out of site, and yet shreds paper fast. I also really like the easy to use, manual feed for shredding more than one sheet at a time. I have been using this product for a while now, and for a good price, I think you can't beat this
