Just deserts 18 patch

It is a common secret that the development of local games is on the rise. Among so many new names sticking out, there is one that caught our attention here, a visual novel called Just Desert. With visual effects and pretty design as seen from the graphics and trailer above, the fact that this game was created by an Indonesian developer is one thing that is far from my first guess. This fantasy war game was created by Fifth Floor, a development team based in Jakarta. More interestingly, the game originally wanted to be created with the support gathered with Kickstarter, but it turns out that the potential of this game was not missed by the Sekai Project, which also successfully brought some visual effects of the legendary Japanese novel to Steam in English, and was finally willing to work with the game's developers to bring the game to Steam without having to go through the fundraising process! You as a player play as one of the soldiers assigned to fight together with a group of highly skilled and beautiful girls. While your main goal is to save humanity, you should also be able to achieve the one girl of your dreams. So far, 5 heroines have been announced that you can get with different looks and properties. Some of them are from Indonesia too. Blasteran anyway. You can already follow the game on your Facebook, Steam page or official website. See also the developer profile if you don't believe they are Indonesian here. The game itself is scheduled for release on Steam this year. I hope, as expected later, yes. Just Deserts is a sci-fi action dating sim where you play as a soldier who has to protect the city from a mysterious alien attack, while at the same time needing to capture the heart of your dream girl (s)! Aquarius is under a surge of attacks by unknown creatures! You are a soldier assigned to a squad of highly skilled and exciting girls. While your goal is to save humanity, you have to find a way to get the girl of your dreams. The visual novel Just Desert Is the full version of the sci-fi action dating sim where you play as a soldier. If you like Shopping Simulator, Beautiful Soundtrack, RPG Combat System and Dating Games you should buy this game. Just Desert Full Review Just Desert SKIDROW is a pretty good short dating sim without too many complications like hard choices or routes, straight and forward for those first timers timers The combat aspect is a good bonus, although it can be a bit tough at the beginning (hell even later its still annoying that permanent shield and heal spam, though), reminds me of some Flash Dating Sim games you'll find online. Pros: Music Great Art Great Female Protagonist Voices are great (most anyway, the curse keeps it quite realistic too) Character personality is a pretty good story character/background/plot good Harem Route (5 thumbs up; even without it Jennifer bae, hell is all of them!) Cons: Needs to accelerate the buttons/functions for battles enemy AI can tone down a bit about what RNG with the shield/healing often too high Needs 18 Patch (Ignore it, it's just my dream ☺) Minimum system requirements for just Desert Full Version : OS: Win XP Processor: 1.2GHz Pentium 4 Memory: 512MB RAM Graphics: DirectX® 9 Compatible Graphics Card DirectX: Version 9.0c Storage: 1GB Available Space Title Game: Just Desert SKIDROW Random, Indy, Modeling, Strategy Developer: Fifth Floor Publisher: Sekai Project Release Date: July 26, 2016 Link Download Just Desert Full Version - 821MB: Just Deserts.rar Just Deserts.rar Just Deserts.rar Just Deserts.rar Just Deserts.rar Direct Download Mirror Link Valeria Head DLC Released!
