YouTube is a platform where you can get fame and big names and be the best on youtube in our field is every creator's dream. So, the most and important thing that came out to me is that the creators should cross 1000 Subscribers and 4000 hours of very difficult watching time for beginners and creators at the starting stage.1000 Customers So, if you're a beginner and struggling to get Customers 1000 then you're in the right place. After reading this article, I will guarantee that you will reach the milestone of 1000. Guys, getting 1000 subscribers is the hardest job for YouTuber at the starting stage. But if you follow the tips given below, I dam sure it will be easy to get that milestone. If you're smarter and want to get 1000 subscribers then follow these best tips that will help you grow your channel in 2020.1. Power Group Facebook. Friends, the power of a Facebook group is fantastic and you can't imagine that you can get over 1000 subscribers only with this resource that will benefit you. Facebook groups are the best for your first 1000 subscribers. Just go and share your content there in a group and have good text that will strike their mind to open the link in a genuine way. Example: I have a Technology channel and I went on facebook and there in the search column I would type technical Guruji/Geeky Ranjit/Tech Burner/ or anything and join these groups. And now I'm going to post Pictures (Thumbnails) and I'll caption it: see these new branded phone advantages, this specification will definitely surprise you (paste the video link)In the way given above I've joined the Technical group just because If I share this type of video in the category of people who like to cook then no one will watch your video because in the categories you've shared aren't interested in your videos but if you share the same And if you join this group in quantity then you can easily get 1000 subscribers on your YouTube channel. JOIN A CATEGORY GROUP & SHARE YOUR VIDEO LINKS & GET BENEFITS2. The InstagramThe process here is the same as for Facebook. On Instagram, you'll need to DM to the selected people with links and some text. Go and follow followers of Technical Teachers, Geeky Ranjit and others and send them a link. Make sure you follow people not by going to profile-&FollowersGo on their latest posts and then clicking on likes, then clicking on likes, then And follow them. Because they will be active people. And then DM them.3. ConsistencyConsistency is the best weapon that really depends on us. Loading up videos consistently will help you develop your channel and an excellent way to get customers in the starting rank. Load up videos daily. Load up videos twice a week. Load up single videos a week. Have consistently consistent upload video. ConsistencyStaying consistency is key to 1000 subscribers. So, consistency and upload videos. As any video went viral, I mean if it's across 1k or 2k views then start making videos on the topic that will definitely grow your customers and watching time. The video will definitely come on your way that will give you the idea that the categories (Micro) you should move on. And sure, you'll expand your channels. After you reach the 1000 subscriber mark, it will be very easy for you to reach 5k subscriber marks and then 10k, 50k, 100k, you will find that you reach 100k is really easy but very important to pass 1000 subscribers with original content because those 1000 people will give you an organic and real audience that will increase you ONLY CONSISTENTLY. VideoPosting topic trends every day are a tough job, but if there's hunger in you then can easily pass 1000 subscribers. Creating videos every day is difficult and getting topics for videos is harder. I have a great idea for trending topics. Go to google and in the google trend type search bar and press enter. This is a free tool by Google itself. Go to the Google Trends section and there select your country (India) and the categories where you create content (Sci/Tech)There you'll get which topic results are going on right now. Once you get a topic from there start making videos and uploading them. Be the first to upload trending topic videos explaining in a good way and a simple way.5. Click the newer's Thumbnail bait keep their thumbnails silent and very poor. When your videos have good and amazing content that people will love and what if your videos come In the list suggested but if your videos don't have a thumbnail to attract people then what usage creates that good content, all of them are just a waste. Have a good thumbnail that attracts viewers. To create an awesome thumbnail using Photoshop. If you don't know how to use Photoshop then go on YouTube and look to make thumbnails for YouTube and watch and learn from 10-15 minutes of videos and explore. Don't waste time watching the entire Photoshop series and wasting the day for all that. Find out what you need. Having a good thumbnail will bring more audience retention. Don't lie in your thumbnails and don't try to edit your thumbnails. You can also create thumbnails in Canva (the best thumbnails online that make a website). I personally use a canva that and the interface is really very simple.6. Facecam, QualityShow Videos your face is in the video because people will have faith in you if you make a video that includes your face on it. And doing facecams can also help you towards 1000 subscribers. Create HD videos that have good quality. Good. I love watching videos of Marques Brownlee and Tech Burner. Watching low-quality videos feels we're bored but watching high-quality videos will definitely take care of the audience until the final moments of the video. So make sure you create high-quality videos. There is no need with a Nikon or Canon camera but mobile will definitely work. As a matter of quality.7. The most powerful tool for TAGSSee, adding the perfect and relevant tags to your youtube videos is smart work. So watch other YouTubers how they use the tags. See how they use tags in their early stages when they have 10k, 50k subscribers. If you make the best videos and you know that this video is created by you will definitely go viral. And when you publish this video with an irrelevant tag then the video won't reach more people. All you need to add is the perfect relevant tag. There is a completely free chrome (TUBEBUGDY) connection that will make your videos grow. Go and download and sign in with your Gmail account. Now open the video that's in your category and just check those keywords (tags) and get rough knowledge of how your keywords (tags) are supposed to be. Now when you get rough thumbnails creating your tags and then publishing your videos. This way, you can point your videos to specific keywords. Download Tubebugdy, a great connection for your video optimization.8. SEOSEO YouTube, Search Engine Optimization is a term that helps your videos reach more people. SEO helps your videos to position at the top for certain terms. For this, you'll need to add the right tags to your videos and use a simple, good title for your videos. Be So I've explained to you how to use some specially targeted keywords in your description box. Yap! By doing this, you can Optimize your videos and the tags section I've explained to you.11. Some cool Be Interactive Tips Always interactive with your startup customers and be best to reply to all comments, whether the comments are positive or negative trying to reply to all of them. Create a bond between you and your customers so that when you upload the next video, they must go back to watch it. Uploading Time MattersAfter uploads a few videos, you can get a clear idea of when to upload your videos. Maybe in the evening or you can go to the analytics section and analyze the best time in which you get more audience retention and then at that time you can publish your videos. Don't copy, little things! Don't always copy or get ideas from big channels. Like, don't copy content especially, go looking for internet content and then publish it. Thumbnails, most people in the early stages of copying the thumbnails of those who have millions of customers. My advice is to make a good and interesting thumbnail because in the first stage nobody is coming and clicking on your thumbnails. So, please make a good thumbnail yourself. Your own Challenge Always has a target for yourself. Like if you've reached 50 views on the first video make sure you reach over 100 views on the second video and more on the third video and so on. Challenge yourself and always be hungry for Youtube Journey goals and beat until you don't reach your goals. Continue uploading videos that have good and consistent content. Don't SUB for SUB Don't ever go for SUB, that means on trending videos that aren't in your category but still you go on that video that has millions of views and you go and comment on that video that: Hey, xyz please subscribe to my channel and I'll do the same for you.
