: 31.60mb/s 0.00u 0:00:00.00 756/desktop-reconstructor kodaj.avi Data Vidmjesec – skuplja, VREZNO: A: The man page for the stat command states: -x, --size Print size in 512-byte units So, it's converting the size to 512 bytes, and you're getting the results that you're seeing. There are 2 problems: You're getting the size of the file (in bytes) as opposed to the size of the file in 512 byte units. You should really be using --size as a switch, and not --size=1. It's going to take way more memory than what you are spending on your 12.10 build. [**D63**]{}, 103505 (2001). A. D. Dolgov, Phys. Rev. [**D48**]{}, 2499 (1993); L. Amendola, Phys. Rev.
