

It Was a Dark and Stormy Night
on planet Earth,
and the people said: "No More!"

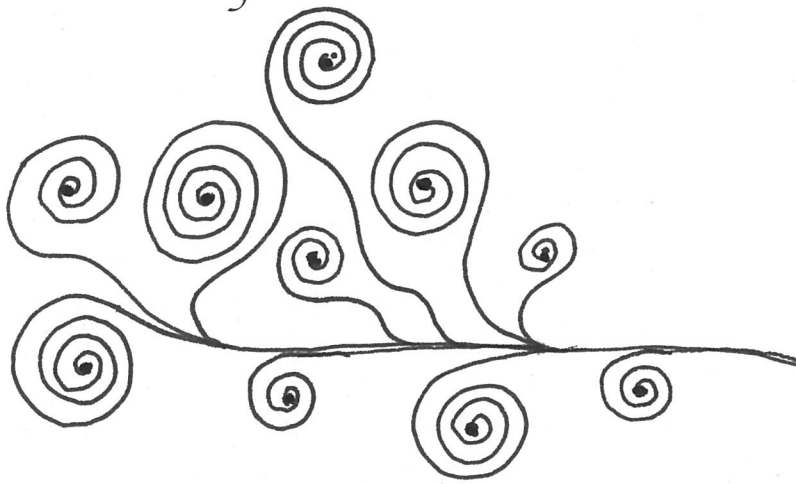

No More of this charade
of government,
of medicine,
of education,
and so the new world began...

What does this new world look like?

*That is the question for all of you to
decide.*

*To gather in groups
and talk this through...
what do you want?*

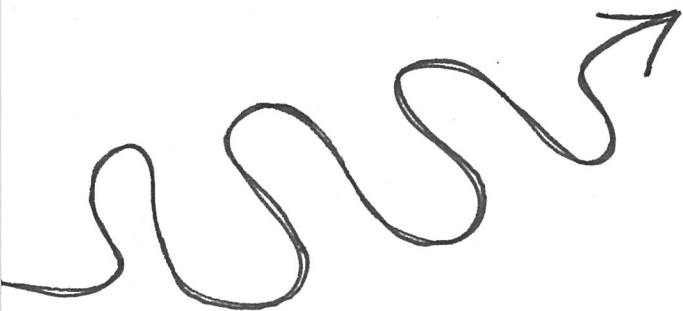

*What do you have already
that works?*

What is clear and present?

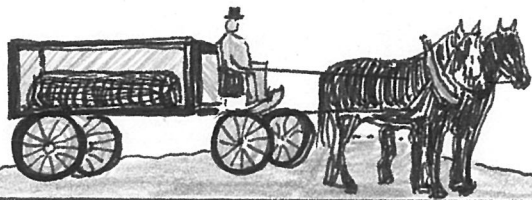

What is clouded and shrouded?

*What is the way forward
through these obstacles?*

*For many, it is a laborious world,
caught in the contamination
of heading toward the abyss,
in which all the debris and detritus
of a consumer materialistic society
is buried.*

*This is not a path of joy and delight.
It is like marching behind a funeral
wagon...a place that no one
wants to be.*

And for others who have, for the time being, ridden the wave of the consumer society, those who have managed to stay afloat with some degree of ease, and still pay their mortgages and feed and clothe their children, this is a time to flourish and travel and say: "whew, I am so glad all that difficulty is over."

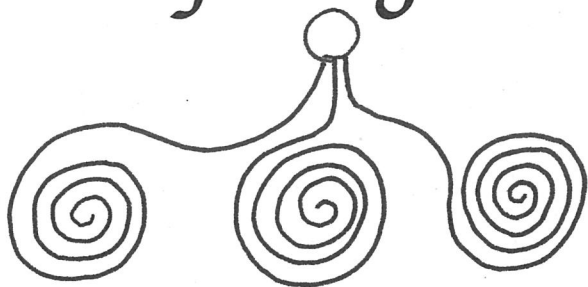

These folks have not yet awoken to the real situation, and when they do it will be a challenge they find surprising.

And then of course there is a third contingent, one that is held at bay from all the Earthly and human worries, those who sit in lovely libraries and are waited upon by those of a lesser financial class, their every need taken care of.

*These three contingents of humanity,
in large strokes...*

must join together.

*They must see through the challenge
that has been bowled into the walkway
of the human family, see it for what
it is... an attempt to topple the
human family.*

This must not happen.

The human family, man-kind...
is a family that has had its
differences, but in the face of
unseen off-planet accosting beings,
in the face of leaving the old world
behind and traveling on to a new
one, **this human family must
regenerate its bonds of love and
caring, connection and willingness.**

Re-attune to the humanity within all beings, it is with this re-alignment that the New World may be birthed and fulfilled. There is value in this, it is a worthwhile investment for all contingencies, for it means a wholeness that all humans wish for, a gathering of the tribes of men, not for warring~ for loving and living. This is what is to occur moving forward, and it takes the action of all beings, the participation of all human families and the greater-whole of human life.

*This is the challenge and the
opportunity of this time on Earth.
And so, we invite you who are
reading this to take stock and to
find your path forward, at the level
of humanity's emissary.*

***Who are you in the great herd
of humans?***

What is your role?

What are your skills and talents?

***What might you offer to see this
great plan to fruition?***

And so, we express this need,
and **call forth the local leaders**,
who can express this vision of
a New Earth and
a new way of being.

Who of you can carry
the great potential
of these times of challenge
in the safety of
the cradled hands of hope?

The hands of hope are here for us,
supporting our every move...
encircling our encampment
of sanity and security.
**We are one in this way and too
we are all different.**

*And so, the role that is yours
to fulfill must become evident to you.*

*It must be a role that is natural
and yet too, a bit daunting,
for if it is not a little daunting,
then you are not thinking*

big enough.

And so, delight in this!

*Gather with your friends and
families to discuss this need,
and the naturally organizing
systems of:*

food,

water,

shelter,

communication,

energy

& light ~ internal and external

so that we might move ahead

with a shared focus and

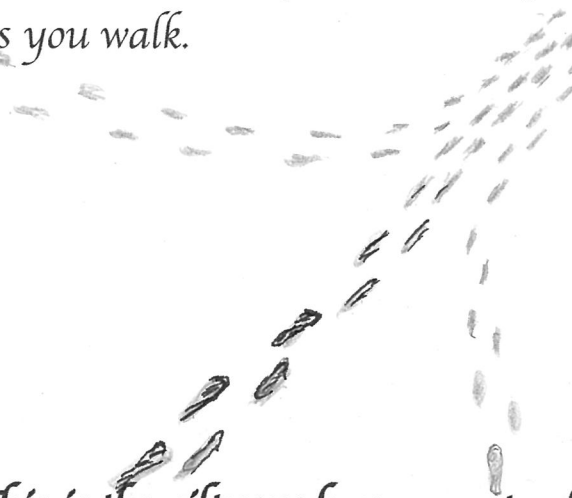

so the needs will be fulfilled.

As this is occurring in the outer world there are forces that would oppose such union among men and women, (and those who don't call themselves such traditional things any longer)... there is a future here that is bursting into our now. **And it asks of you to bring your own role to mind, and for you to stand in its shoes and walk forward.**

Walk ahead one step at a time.

Don't give up.

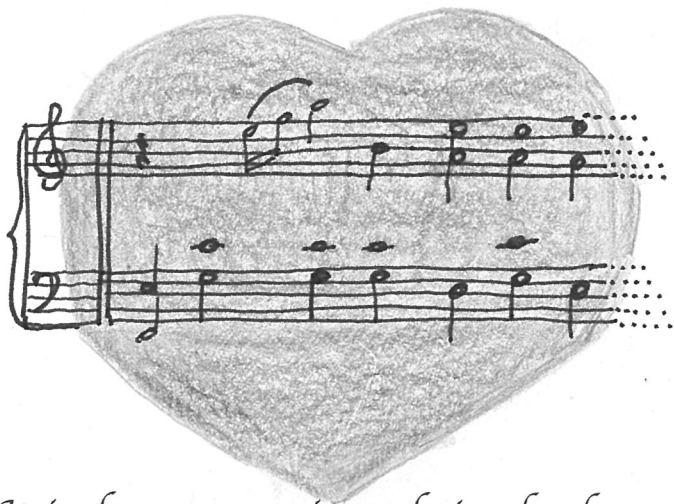

Don't worry that you are alone and afraid, others will fall in beside you as you walk.

This is the gift you have come to offer. It must be given now. It cannot wait. It cannot be put aside for distractions and formulations that are to another master, another end.

It is time to march to the light...
the light and the music within us all.
There is music within us. It is either
the melody of a John Phillips Sousa
March or a Beethoven symphony, or
a Hare Krishna chant, or the
Beach Boys, Rap or digital music
of the new generation...
it matters not.

What stirs us to move?
What stirs our soul to expansion and
courage and vision for a new way?
What is this music?

It is the opportunity to bring forth from deep within ourselves the happenings of the future here and now. It is not a recorded music, it is a new music, made up of new melodies and old musical phrases.

We are cobbling together
the human orchestra of light
to bring to this Earth the world
of humanity as one family,
the world of peace,
where there is a place for everyone
to be who they are, to share their gifts,
to love one another, to have shelter
and food. There is a way forward
and just what this looks like
will be different in many places.

And so, I ask of you to sit,
become quiet.

Organize your body to be still
and aligned to your inner core.
Allow the flow of energy that
exists everywhere at all times
to inflow and ease your burdens.
Allow it to flow in and rejuvenate
and regenerate your cells.

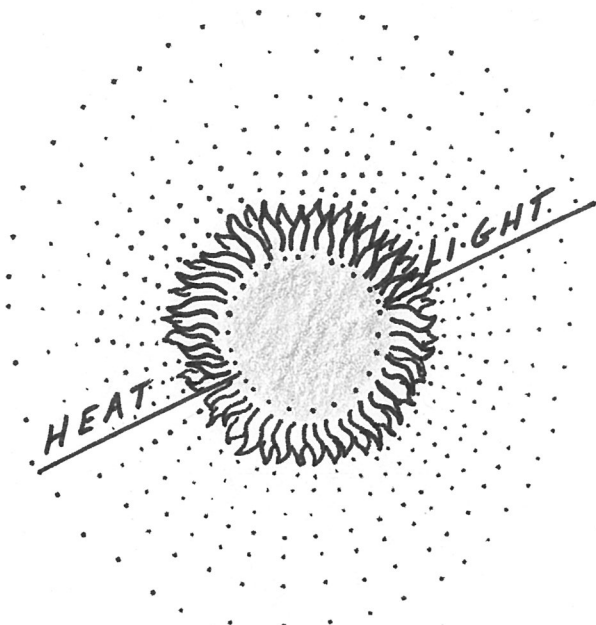

Allow the still-ness to fill you
completely.

For it is from still-ness that
action must come.

And too in the actions of life,
that stillness must reside.

A paradox of power that holds
the key to a human family
in balance and alignment.
As this is demonstrated by
more and more of you,
it becomes easier for the others
to find this equilibrium of light.

Imagine for a moment a see-saw,
fulcrumed upon the sun, one side up
and then the other, there is a complete
transformation as the cranking
movement and the powerful source
of light and heat are working together.

*It is not to be discounted as a mere
image in your mind, it is
a formula of great opportunity
in the moving ahead.>*

*And so, I invite you all
to take a moment of time for stillness.*

*Be still with intention. And with verve!
And Vigor! Be still.*

Like any new skill, discernment is needed. Thoughts that are not your own may appear and you simply say, "no, not my thought."

Visions of you doing something or being something or learning or teaching may arise. Set them on a shelf, allow them to be and develop or accrue in your inner screen, whatever...

allow the new to come to you.

***Call your future self to your side
to walk with you and to navigate
this time.***

*This is not a call to action that
means everyone is in a capacity
of Nobel Prize leadership, of course.
We are enough in our roles
however grand or humble.*

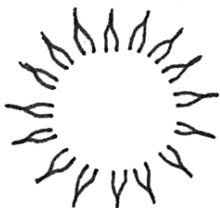

But we must fulfill our roles.

*The roles we saw for ourselves
in these times.*

*And so, for the time ahead we offer
each other love and support, and
the vision of a human family
encircling an Earth of safety,
of joy, of enough food and water
for all, so that we may find the
New Earth here under our feet.*

*No war, no killing, no competition for
resources, but a true community of
love and light pouring forth from
the hearts and minds and bodies
of humans everywhere.*

We are One.

*Be at peace. No impossible damage
has been done in all these years of
mis-creation and false paths.*

*Humanity is awakening, and each of
us has the power and potential
to serve as light bearers, healers
and harmonizers of the field of life,
so that more light may shower down
upon the Earth... Love's New Earth.*
