: //apple.com/WebObjects/[web object id]/ws/servlet/WebServer?pid=H0ZCw.bZGC7.&... I couldn't find anything relating to this on SO, so I ask this question. A: You can use proc_open to launch the camera. It will let you specify parameters to the camera. Impact of a novel technique for femoropopliteal bypass in a diabetic patient. The treatment of lower extremity ischemia in patients with diabetes is associated with multiple challenges. We report a case of diabetic lower extremity ischemia that was treated with novel technique of proximal aortobifemoral bypass. The patient presented with critical ischemia of the left lower extremity. A 5.0-cm occlusion of the left distal superficial femoral artery was treated with the aortobifemoral bypass from the distal aorta to the proximal superficial femoral artery with a 5-mm bifurcated Dacron graft. The patient's postoperative course was uncomplicated. This novel technique may be a good alternative for the treatment of lower extremity ischemia in the setting of diabetes.Q: Codeigniter: embed a helper in a view Is it possible to embed a helper class in a view? For example, in the tutorials, you use helper('form') for the textbox helper: 'form', 'onblur' => 'ignoreMe(this)', 'onfocus' => 'focusMe(this)'); echo form_input($attributes); ?> The main purpose is the embedding of the helper, so I don't have to create a textbox helper every time I need one. But I cannot use this, because it says: The Undefined property: CI_Loader::$helper Is there a way around this? Why don't you just embed a php file that contains the helper and call the helper method from that file? 'form', 'onblur' => ' 520fdb1ae7
