Arris drc800 remote codes

The remote programming: Turn on the device you are scheduled the remote for (TV, VCR, etc.). Press and hold 'Function key' (TV, cable, VCR or AUX) until the map function blinks twice. Enter the 4-digit code for the desired device. Target the remote control of the device and press Power once. The device should be locked. NOTE: If it is not answered, repeat steps 1-4. If it still doesn't work, try searching for the code. search code: Turn on the device you are scheduled the remote for (TV, VCR, etc.). Press and hold 'Function key' (TV, cable, VCR or AUX) until the map function blinks twice. Press POWER. Repeatedly press CURSOR until the device turns off (you may need to do this a number of times). When the device turns off, press 'OK' to close in the code. change locked volume: By default, volume is controlled in your cable box; but if you have a TV that enables volume control, and you would control the volume it, follow these steps (this procedure doesn't affect the device codes you set previously). To control the volume of the TV while in cable mode: Press and hold TV until the flash function maps twice. Press VOL+. You now control the volume of the TV whenever you change the volume level of Cable mode. If you would like to return to volume controls in the cable box, follow these steps: Press and hold Cable until four keys are flash mode twice. Press VOL+. You now control the volume of the cable box each time you change the volume level of cable mode. Equipment guide click here for user guide if your TV, VCR, or Auxiliary Components does not respond to the DRC after trying all the codes listed for your brand, or if your brand is not listed at all, try searching your code.
