This wonderful book looks at the construction, testing, and uses of the first generation of nuclear weapons. For those interested in nuclear history, this is a must have. It is beautifully written and contains many superb photographs. It is a little pricey, but worth the investment. **\*\*Nuclear Heritage\*\*** By Paul H. Kratzer Author Information Paul H. Kratzer has published numerous articles on the history of the nuclear weapons programs, and has written many books including "The Right Stuff," "The Atomic Scientists," and "Exploding the Myths." He is an editorial board member of the Journal of Contemporary History, has been a consultant to the United States Department of Energy, and is the co-founder of the National Consortium for Nuclear Studies.

**\*\*Nuclear Science\*\*** By Dennis L. Meadows Dennis L. Meadows, Professor Emeritus of Environmental Studies at the University of Massachusetts, is a Pulitzer Prize-winning environmental journalist. He is the author of "Down to Earth," a history of the environment, "The Limits to Growth," and the founding co-editor of the book series "Endangered World," all published
