Netflix movie after we collided sequel

(Image credit: Jasin Boland) Netflix is looking to film Extraction 2 this year, according to director Sam Hargrave. The sequel to 2020's Netflix smash hit – which released in late April 2020, just as theaters around the world closed en masse and people were hungry for a solid action movie – is expected to see actor Chris Hemsworth reprise his role as tough guy merc Tyler Rake.Story details are thin on the ground. Extraction ended pretty conclusively, without spoiling how the finale went down – but Netflix was quick to put a follow-up in place, making a deal with Joe Russo (one of the Avengers: Infinity War/Endgame directors) to write a sequel back in May 2020. Collider recently asked Hargrave if the plan was indeed to film later this year – and the director confirmed that was the case, with the production targeting a Fall 2021 start. "[That's] still the case, COVID-pending. That's kind of everyone's little caveat right now, but we're moving forward on it as if we're shooting in the fall. Joe [Russo] is still finalizing the script. We're all excited to read it. I've read different iterations, but I'm excited to read what he turns in. We're all looking forward to getting back in the saddle and hopefully bringing another action-packed adventure in the 'Extraction' universe."Hargrave wouldn't be drawn on many details about the sequel in terms of story, but says that pushing the envelope when it comes to action sequences is something he's focused on. Hargrave was a stunt co-ordinator and second unit director on both Avengers: Infinity War and Avengers: Endgame, and the first movie's greatest strength is how brutal and exciting the action is. It was sort of like Man on Fire meets John Wick. As far as Netflix's original action movies go – and they're a variable bunch – Extraction was up there as one of the best. Expect to see Extraction 2 hit Netflix in 2022 at the earliest. Extraction was the type of movie that you don't see released in theaters as frequently these days – mid-budget action movies with one or two big stars. Netflix, though, has made a slew of these types of films (see also Spenser Confidential and The Old Guard for recent examples), suggesting they're popular on the platform.It's hard to envision a world where we'd have paid full-price for a theater ticket to see Extraction – but then that's why it's a great fit for Netflix. The media matches the way it's being distributed. And with the future of theatrical movies still looking uncertain, we'd happily invest two more hours in watching Chris Hemsworth beat up a load of dudes. Netflix will release a new movie every week in 2021 (Image credit: Daniel McFadden) A sequel to Spenser Confidential is in the works, one of Netflix's most popular movies of all time. Starring Mark Wahlberg and directed by Peter Berg, the 2020 comedy/action movie was watched by 85 million households in its first month – no doubt helped by the fact it was released in March, just before the pandemic hit and everything shut down.The news was confirmed by Berg, who mentioned that screenwriter Brian Helgeland was already working on a script for a Spenser Confidential 2 in a conversation with Collider. "Brian Helgeland, who wrote the first script, just turned in a first draft last week. So we're definitely going to do Spenser Confidential 2, we're just trying to figure out the dates." Collider mentions that Berg is aiming to have the film in production by the end of 2021, or by early 2022.Netflix has some form in making sequels to its original movies: films like The Kissing Booth and To All The Boys I've Loved Before have already received follow-ups, while a sequel is reportedly in the works to the Chris Hemsworth movie Extraction. Spenser Confidential is about a former police officer (Mark Wahlberg) who gets out of jail, and finds himself teaming up with an MMA fighter (Winston Duke) to find those who killed his old cop buddies. Critics didn't love the film, with Rotten Tomatoes' metric suggesting that just 36% gave it a positive review. Still, can 85 million households dealing with a global pandemic really be wrong?Best Netflix moviesBest movies of 2020 so farTenet ending explainedCulturally, this will be remembered as a strange year. Theaters are reopening now in most countries as Tenet finally hits the big screen, but the lack of a summer movie blockbuster season this year has paved the way for Netflix to grab a lot of attention simply by having plenty of product in the can.The Old Guard, Project Power, Extraction and Spenser Confidential are all movies we ended up watching because they gave us something to do. Even if none of those films are perfect, it's certainly better than a season without any big new films to enjoy. The Old Guard, a new action movie from Netflix, was the most-streamed film on the platform this past weekend. Starring Charlize Theron as a not-your-average superhero, the film is quickly picking up fans and critical acclaim. But does that mean we'll get a The Old Guard sequel? Here's what the director, Gina Prince-Bythewood, and the screenwriter, Greg Rucka, had to say. 'The Old Guard', based on the comic book of the same name, is trending on Netflix The Old Guard cast | Courtesy of Netflix The story of The Old Guard comes from a graphic novel written by Greg Rucka and illustrated by Leandro Fernandez. Rucka (who wrote the screenplay) and director Prince-Bythewood took the well-reviewed comic book about immortal superheroes and turned it into the Netflix movie. The Old Guard film covers the same material as the graphic novel The Old Guard: Opening Fire, a comic book consisting of 5 issues, published in 2017. The first issue of The Old Guard: Force Multiplied (the 2nd book in the series) came out in 2019, and the next issue will be released in September of this year. So, the material for sequels already exists — but do the director and writer want to keep making The Old Guard? Will there be a 'The Old Guard' 2? In an interview with Collider, Prince-Bythewood explained how she felt about the idea of an Old Guard sequel. "I would really have to think about that," she admitted. "It's been two years, and just coming out of it now, I'm eager for a rest." RELATED: 'The Old Guard': Why Is Charlize Theron's Character Always Eating Baklava? She expanded on the thought: I would probably feel two ways about it. If it continues on, I was the first that established it, but it would probably also bug me and I'd be like, 'Nile doesn't do that!' So, I just don't know. Answering a separate question about the end of the movie, The Old Guard director revealed: "I want you to want more, but again it is wholly up to the audience." (Also, if you didn't catch it: there's a post-credits scene!) Continuing to discuss the conclusion of the film, Prince-Bythewood explained she kept it rather open-ended because "it was part of the graphic novel." She went on: I always loved it because I felt there would have been a hole, if it didn't end the way it did. …I know how I feel when things are left open, but for me, we told the story. It does have a beginning, middle, and end. And then, there is a hint and a possibility of more, but that's absolutely up to the audience. She did acknowledge that the author, Rucka, "has always envisioned [The Old Guard] as a trilogy." "I know where the story is going and it's pretty dope," Prince-Bythewood told Collider. "So, if the audience wants more, there's certainly more story to tell." Graphic novel writer comments on the idea of a sequel to the Netflix movie Charlize Theron as Andy | Aimee Spinks/NETFLIX Rucka, the graphic novel author of The Old Guard, also commented on the idea of a sequel in an interview with Looper: There is a complete three-part story that can be told and, God willing if it's a success, Netflix comes back and says, 'Hey, let's do it again.' There's more to tell, and there's questions that we want to answer. But right now, I gotta tell you this: If this is all we get, I am going to be a very happy guy. Based on The Old Guard's early success (it sat at No. 1 in the U.S. its opening weekend), as well as the creative team's openness to the idea, it seems likely that we'll get another one in the series. Source: Netflix Netflix may put a huge number of movies and TV shows at your fingertips, but actually finding the content that you want to watch can be an annoying task. Because the streaming service's search functionality is often difficult to use, Netflix subscribers have found a number of workarounds, like using multiple profiles at a time or figuring out Netflix's codes for your favorite movie genres. Nonetheless, searching for TV shows and movies can be the worst thing about using Netflix. Because it's so difficult to find your favorite content on Netflix, a number of free web apps have popped up, offering a better way to search for the movies and TV shows you want to watch. And with Netflix's recent global expansion — the company announced at CES that it's launching its streaming service in an additional 130 countries — it's the perfect time to find an app that enables you to get more out of your Netflix subscription. 1. Flixed Flixed is a new website that integrates IMDb ratings and Metacritic scores, plus universal search functionality so that you can determine whether the content you're looking for is available in other regions of the world, especially useful given the service's recent expansion. Flixed also enables you to watch trailers, plus browse popular content and new arrivals. Flixed is still in beta, and its eighteen-year-old creator, Thenuka Karunaratne, tells The Next Web that he's working to add localization information for all of the countries where Netflix just launched. 2. Flixlist Flixlist enables you to search Netflix's catalog by title, director, or cast member, while filtering by Rotten Tomatoes ratings and MPAA ratings, so that you can figure out if a movie is worth watching, or appropriate to watch with your kids. With Flixlist, you can also browse Netflix's catalog by genre or by categories like Academy Award winners or the top movies on IMDb and Rotten Tomatoes. Flixlist advises its users to sign up for a VPN service called UnblockUs, which it reports can give U.S. users access to more than 13,000 additional titles. Source: Netflix 3. Flixsearch Flixsearch is a site that's specifically aimed at users who want to tap into the huge amount of content that Netflix has made available to subscribers in different countries by launching its streaming service in almost every country around the world. The site enables you to search for movies and TV shows by title or by the people involved. Flixsearch advises users to sign up for a premium DNS service called Iron Socket, which enables you to easily watch content that's being offered to subscribers in different markets — whether that's local content intended for subscribers in a different country or classic films that have long been removed from the Netflix catalog for users in western markets. 4. FlickSurfer FlickSurfer offers a simple interface for a powerful search tool. Unlike a few of the other options, the site isn't limited just to Netflix's U.S. catalog but doesn't yet have information on all of the markets where Netflix is available; you can currently search Netflix content for the U.S. and 20 other countries. FlickSurfer offers you an easy way to browse genres like action, comedy, documentary, family, and sci-fi. You can search by title, director, or cast member, and filter by the average ratings a movie has received on IMDb, Rotten Tomatoes, or on Netflix. 5. Instantwatcher Instantwatcher is a great choice for users who depend on Netflix and Amazon Prime for their TV and movie-watching. You can search both services from Instantwatcher's site, where you can refine search results by MPAA ratings, or by ratings not only at Rotten Tomatoes, but by NYT Review ratings, by which titles are award winners, and which ones have been nominated for awards. Those last few filters are unique to Instantwatcher and can be especially important to users who want to make sure that even when they're just hanging out and watching a movie, they're seeing something worthwhile. 6. JustWatch JustWatch lets you search content on Netflix (and more than a dozen other platforms) from your browser or from its apps for iOS and Android. You can search for TV shows and movies, browse popular content, and even create a watch list to keep track of all the shows and movies you want to watch, both on Netflix and on the other platforms you use. If you want a single search tool you can use both with Netflix and, say, HBO Now, Showtime, iTunes, or Hulu, then JustWatch is a great choice. 7. Leanflix Leanflix offers a sleek way to browse and search the movies that are worth watching not only on Netflix, but also on Amazon Prime, HBO Go, iTunes, and Amazon. You can browse by genre, filter by year, or opt to set criteria for the ratings titles have earned on Leanflix, Rotten Tomatoes, or IMDb. You can mark movies as seen or add them to the list of titles you'd like to see, plus take advantage of Leanflix's algorithm that sorts movies from best to worst so that you always find something good to watch. Justin Sullivan/Getty Images 8. Netflix Roulette Netflix Roulette is the tool for you if you're usually indecisive when it comes to selecting a movie or a TV show. Just select a genre and hit "spin" to have the site automatically select a film or show. (You can also filter the results by rating, director, actor, or keyword if you have an idea of what you want to see.) The site provides a single result at a time, and you can always spin again if the film it chose doesn't pique your interest. 9. Sense Another great option if you don't need a Netflix search tool as much as you need smarter recommendations is newcomer Sense. While Netflix's recommendations often make you wonder how much the streaming service really understands your taste, Sense's are much more personal. In fact, you simply text Sense from a U.S.-based phone number and get a recommendation that's relevant to you (as determined by a movie you say that you like or your response to a one-question quiz). You'll get a single option back, with a trailer and a link to the movie on Netflix. If you aren't excited about the trailer, then you can just say so and get another pick. Family watching Netflix | Lauren Lewis 10. uNoGS uNoGS, an acronym for "unofficial Netflix online Global Search," offers a no-nonsense way for you to search the Netflix catalog across the many countries in which the streaming service is now available. You can select which countries you want to search for content in (or just opt to search all of them if you're already using or intend to use a VPN). You can also see which movies and TV shows have been recently added, and which ones are scheduled to be removed, or refine your search results by Netflix rating or IMDb rating. 11. What is on Netflix? What is on Netflix is a simple tool that helps you find the best-ranked movies on Rotten Tomatoes, IMDb, or Metacritic, or to keep tabs on what's new on Netflix. It won't help you search for specific titles, or for movies by the director or a cast member, but it's a great tool to have in your browser (or on your phone with the Android or iOS app) for the times when you just want to sit down and watch something that'll be good, without spending half an hour scrolling through options.
