Some streaming services are years without the possibility of downloading shows and movies for offline viewing, but this feature was available on day one of Disney+ There are more than 600 titles to dive in, enough to binge hundreds of hours on The Simpsons without watching even a fifth of what's available. Ideal for airplane rides and frugal data spenders, the service download feature - which is only for mobile apps like this writing - is so easy even For Olaf to use it, and with every title eligible, it's just a matter of figuring out what you want. Here we take you through the process of both downloading and deleting movies and showing your Disney+ app. Discover Disney + Download movies and shows at Disney + Step 1: Choose your download quality Before we have our fun, let's talk about file sizes. If you are hurting storage space on your iPhone or Android smartphone, Disney+ includes a variable quality feature that allows you to sacrifice visual fidelity for a smaller digital footprint. On your smartphone, open the Disney+ app (iOS, Android) and click your profile icon in the lower-right corner. From there, scroll to the app settings &gt; download quality. You can see the options standard, medium and high, the latter likely offers no more than 1080p resolution. Step 2: Download your content because you can view any Disney + title offline, no guesswork or filter is needed to find downloadable content. The hardest part of this particular task is figuring out what you want to watch. Once you understand this field with the button field button, you must tap the download button below the play button below the title logo. For programmes, you'll also find a separate download button next to each episode if you don't want the entire season. Disney takes care of the magic from there. It's relatively fast to download Wi-Fi, especially with lower quality, so you'll probably snag dozens of movies on them a few hours before your flight if you forgot to do it the night before. Step 3: Watch your downloaded movies and shows All that's left to do now is enjoy yourself! An easy way to find your downloads is by hitting the download icon, which is always visible at the bottom right of the Disney + app. All your content is listed here, sorted during download. Tap the play button on and off the thumbnail you want to view. The episodes are listed a little differently - they're nestled under one label and tapping it presents all the episodes you've downloaded to the show, grouped by season. You can also find these titles through regular searching and browsing. You know something is available for offline viewing when you see the smartphone icon where the download button usually sits. How much space do I need? Put-away room quantity for each Eats based mainly on video length and resolution, and other variables playing the equation - the largest being your quality device - this number can vary greatly. We downloaded three movies of a similar length and resolution - some Star Wars movies that clock in just over two hours each - to see how each of the options affected the file size. The Empire Strikes Back standard quality was 0.92GB for a 2-hour, 7-minute runtime, while new hope average needed 1.4GB for 2 hours and 4 minutes. This is a modest jump compared to Return of the Jedi high quality, which required 5.5GB in 2 hours and 14 minutes. For the shows, a 39-minute episode of Mandalorian high quality takes 1.5GB, but only 270MB standard and 424MB average. Finally, at a 3-hour, 1-minute runtime, Avengers: End Game needs a whopping 7.1GB. Use the data above to work out a rough estimate of how much space you need to save everything you want. Before you start downloading, you can mix and match them by adjusting your quality setting. Now would also be a great time to determine whether you need a Wi-Fi connection to download content, the possibility of this limited data certainly should be considered. By default, Disney+ allows wi-fi category downloads. What's available? As explained above, everything in the Disney + catalog can be downloaded for offline consumption. Whether it's the entire season of The Darkwing Duck or every movie in the Marvel Cinematic Universe, if it's Disney+ you can download it. Unlike some other services, Disney+ has quite loose restrictions. To start with, you can download one title to up to 10 different devices at a time and download any of them as often as you want. The only thing Disney asks is that you connect to Disney + every 30 days. How do I delete titles? Finally, you want to make room for something new. Whether you want to delete one title or a bunch at a time, Disney + makes the task delightfully easy. Step 1: Delete one title If you want to wipe titles from your device, the process is much easier than downloading files. In fact, it only takes you a few seconds to delete something from Disney+. First, find your content in the downloads section with the title. You can access the download area by tapping the other icon on the right side of the app's navigation bar. Find the movie you want to delete, and click the smartphone icon to the right of its title. Select Remove download and the title will send itself straight out of your smartphone's storage space. If you delete a few movies or shows you've selected, it's an easy way to do it. Step 2: Deleting all titles there are two easy ways to remove multiple titles at once from your Disney+ profile. Under Downloads, select Edit in the upper-right corner of the screen, the check boxes appear near your headings. Click the check box to select the appropriate title. Once you've marked all the headings you want to delete, select the Recycle Bin icon. Similarly, you can click the Select All button to select the headings you want to delete. When you tap Select All a second time, it will cancel all headings. If you're looking for an even faster solution to mass deletion, Disney+ offers it. You can tap your profile icon on the bottom right and click On App Settings &gt; Delete All Downloads. This option allows you to trash all with one button, leaving more space for whatever new titles you want to download next.
