Arpal liguria previsioni meteo pdf

Details of Meteofenomeni do not significant details Of the Meteoventry FORTE Detailed METEOMAREGGIAVENTO BURRASCA FORTE From August 1 Arpal publishes daily air quality bulletins for the four Ligurian provinces. Thus, by 2:30 p.m., you can see a photo of pollutants in the air of our region, relating to the previous day. Ballot papers can be found on the Arpal website, in the Air section, and are published every day throughout the year. From Monday, October 5, ballots will be renewed, Monday to Friday, also on the agency's Facebook page. As noted, the ballots will continue to be available on the Arpal website, in the air section, as well as on Saturdays, Sundays and holidays. On Thursday it is very cloudy with weak rains, increasing phenomena from noon, also a thunderstorm especially in the evening, strengthening winds. Friday day is outraged everywhere with rains and thunderstorms even severe intensity, the southerly winds further reinforcement with possible storm surgesPresenters: CFMI-PC Staff Here is a weather warning issued only now Arpal, for bad weather - sometimes very intense - coming to Liguria in the coming days: Today, Wednesday, September 30, nothing to report. Tomorrow, Thursday, October 1, the approach of a vast Atlantic bag forces the arrival of wet and unstable air masses. In the evening, scattered thunderstorms with a low probability of severe thunderstorms are possible, localized flooding is possible, possible punctual damage to isolated raffiches... and wind or tornadoes, hail and lightning, small landslides. Civil protection reminds us to abide by the appropriate rules of self-defense. On the reliefs of ABC and DE, the south wind is strengthening to strong (50-60 km/h). The day after tomorrow, on Friday, October 2, an extensive bag with a connected frontal system tends to affect a region with widespread rains with amounts up to very high on ABC, high on DE with sediment intensity to strong, locally very strong. High probability of severe or organized thunderstorms. S-SE winds strengthen throughout the day with up to strong storm values on ABC and ED reliefs, gusts up to 90-100 km/h. Rising sea to rough, locally very excited to wave from S with a period of 7-8 sec. Long storm surges are expected. This morning, thickening is affecting the central sector of the region, while other cloud strips are located offshore, especially in Ponzent. The wind is weak, north along the coast, further south inland, while the sea is gusty with swell in the fading. Overnight, the minimum temperature was recorded in Pratomollo (Borzonaska, Genoa) with 4.9, while in other provinces the lowest values were at Colle di Nava (Pornossio, Empire) with 5.1, Calizzano (Savona) with 5.7, Cuccallo (Sixth Yearno) 7.8. These are the lows in the reference stations of provincial capitals: Genoa Functional Center 17.2, Savona Maritime Institute 14.9, Imperia Seismic Weather Observatory 16.8, La Spezia 14.1. Now, as mentioned, Liguria is preparing to face a phase disrupted with bad weather at times intense. Tomorrow, October 1, is expected to worsen, which will affect the entire region with heavy rainfall, even thunderstorms. Significant levels in waterways are also expected to increase region, especially in the centre-east. Given the high uncertainty of the scenario, this will be better analyzed with tomorrow's model outputs when the highest-resolution models are available. Page 2 Vote! The team works 24 days a week to provide the latest and reliable forecasts. At the helm of the company, in April 2019, he assumes the position of CEO Colliè. ilMeteo.it provides its meteorological services in b2c and b2b with many customers who are part of the world of media, business and government. Among the most important editorial publications such as La Repubblica, Il Secolo 19, La Stampa, Il Messaggero, Il Mattino, Il Gazzettino, Leggo, Il Corriere di Umbria, L'arena, Adnkronos and AskaneWS; radio stations such as Radio Italia, DeeJay, Capital, M20 and companies such as Trenitalia, Fincantieri, Enel, Autogrill, OVS, Bottega Verde and Salmoiraghi and Vigan. For predictions, ilMeteo.it uses the new internationally recognized mathematical system as one of the most accurate, THE 2016 BG, four times higher than the previous one, and as a result of many years of research and research supported solely by private funds. Thanks to the yawn of 2016 HD, the team ilMeteo.it can work on now, very short-term forecasts, but is also able to compare on medium and long term. As for the first, the de ilMeteo.it team manages to make up to 7 days of forecasts for the Italian and European region with details of up to 1 km, which distinguishes the exceptional diversity of microclimates of our territory; For the latter, it uses an innovative ensemble technique that makes it easy to identify the most likely weather evolutions among the 50 possible for the most remote predictions. Thanks to the continuous work and comparison of the team and the innovative and accurate systems it uses, ilMeteo.it has an average of 24 million unique users each month, 14 million of whom are new users. ilMeteo apps are used by about 8 million users and one, in particular, ilMeteo, is the most downloaded weather forecasting app on the Apple Store and Android Market. 68.5% of users see ilMeteo.it from a mobile phone, while 26% from the desktop and the remaining 5.5% from the tablet. 18 to 65 years old, all women (51.1%) men (48.9%) Look at our platform, with an increase in the 25-54 age group ilMeteo.it in 20 years of activity has become the most popular weather spot for Italians, confirming it is also audiweb surveys that see it at the top of the ranking of Italian publishing sites. To establish the success of ilMeteo.it in recent years: the ability to make specific but great interest content such as weather forecasts available to an increasingly wide audience. This is due to the clear and simple language that over the years has defined the tone of voice of the site: popular, playful, straight. An integral part of the de-ilMeteo.it images, which with a selection of bright colors and graphics are always recognizable represent the destination that is now needed for millions of users.
