Thank you for your support. Disclosure Policy I still remember unboxing my Cricut Maker for the first time on Christmas morning. There was so much excitement as different craftsmanship projects ran in my mind, and then i opened it And I felt a little lost. What's the matter now? Why is the manual textbook the size of a textbook? What are these wires doing? I went online searching for answers to my questions and still felt lost. Dude, I don't want you to feel that way with your Cricut Maker. The new craftsmanship machine is an amazing tool and is going to allow you to do amazing things in your home and for your loved ones. For this post, I'd like to answer some of the most urgent questions, share some helpful tips, and if you're still feeling lost, please leave a comment and we'll add your question to our growing list. What does your cricut maker do? Your Cricut Maker is an amazing craftsmanship tool that will allow you to create projects in over 100 materials! Some of the popular crafts you can make include using vinyl, a variety of fabrics, craft foam, papers (including card stock), and more. For a complete list of all the ingredients your Cricut Maker can cut, read on here. If you want to craft with more robust materials, then you will love using the new knife with Maker. Learn more about knife knives and read an honest review of this new accessory here. How do I set up my Cricut Maker? The first thing I always recommend anyone with a new Maker is to take the time of unboxing the new cutting machine. I have a lot of information when you first open your box and I want to enjoy a great experience and new crafting best friend. The first thing I recommend you do is open your Cricut Maker at a long, solid table. Preferably if you have a craft room crafting table. (If you're like me and your workmanship desk is the kitchen table, then I strongly recommend that you wait until the little ones are in bed. Otherwise, they may also want to show their excitement for the new Maker). After you open your box, you'll want to take everything out and lay it out in front of you. Here are the main components you'll notice in your box. Cricut MakerA Guide – Take the time to read through this booklet, although manual can seem scary at first glance. This guide is a great resource for answering your questions. You can also send me a message or leave a comment. I'm happy in every way I can help. Two Connection Cables – you'll find two cables in your box. A cable connects power to your Cricut machine and the other cable connects your Cricut to your laptop. If your laptop has Bluetooth compatibility, then you don't need to use this cable (but please, don't throw it away!) A few Accessories - one of the first things I noticed, when I first saw the cricut box, was the number of accessories! I felt a little overwhelmed learning more about Cricut in particular. After I opened the box, I pulled out a rotating knife, a thin dotted knife with a torso and a Cricut thin dotted pen. A Base for Maker - I'm keeping my Maker box because This craftsmanship machine is packed. If I have to take my Maker to a friend's house or a craft fair, I know the original box will give my Creator the support he needs. I knew I would want to learn how to use the scoring wheel and knife at a later date, but the projects that started with the rotating knife and the thin point knife were perfect for starting. Is Cricut Maker Using Cartridges? Did you buy a Discover before you bought your Maker? If you have cartridges from your old Cricut machines, you can still use them. Just upload them to Design Space and associate them with your account, so you can access them instantly. Read this tutorial to learn more about what Cricut cartridges are and how to install them in yours Design Area. What is the thickest material a kroncut manufacturer can cut? Cricut Maker is incredibly robust, but if you want to use more robust materials, you'll want to invest in a knife knife. Knives can cut materials such as knives: Balsa woodBasswoodCricut ChipboardCraft foamLeatherGarment Leather, soft, 2-3 oz and 4-5 oz. Team Call Skin, hard, 2-3 oz, 4-5 oz and 6-7 oz. Matboard I personally use and love my knife knife. I found that using more practical knife blades with this tool becomes easier. There's one thing I tend to forget when I use a knife. When crafting with this tool, please move your white star wheels to the right on the cylinder bar. If you don't move the wheels of the white stars, they will leave the trail and trail on the thick material (trust me, I know!) and you need to recreate this part of the craft. What's the best in Cricut? If you're having trouble making decisions between Cricut Maker or Explore, your biggest decision-making factor is knowing your purpose. Want to use paper and vinyl crafts? Then one of the Explore options will be perfect for you. Or, would you like to use fabric, leather, wood, and paper and vinyl? Then Maker will quickly be his best friend in crafting. What questions do you have about Cricut Maker? Leave a comment below and I'll add your questions to the growing list! Be sure to share this post with a friend who is a Maker. As always, I'd love to hear articles I have resonated with you the most! Feel free to contact [Email protected] or post on Instagram! For other inspiring ideas, you can also follow the Home Faith Family board on Pinterest. Making this no-glue box is a breeze with the new Scoring Wheel for Cricut Maker.
