

IMPORTANT INFORMATION ABOUT YOUR DRINKING WATER

Monitoring Reporting Requirements Not Met for ROWLESBURG WATER WORKS WV3303914

Our water system violated drinking water monitoring requirements. Even though these were not emergencies, you, as our customers, have a right to know what happened and what we did to correct the situation.

We are required to monitor your drinking water on a regular basis. Results of regular monitoring are an indicator of whether or not our drinking water meets health standards. During periods listed in the table below, we did not monitor or test as required and therefore cannot be sure of the quality of our drinking water during that time.

What should I do? At this time, there is nothing you need to do.

The table below lists the monitoring we did not conduct, other violations, and the associated compliance period.

Monitoring Violation	Year-Fed Report #	Monitoring Frequency	Compliance Period
02, MCL, AVERAGE TOTAL HALOACETIC ACIDS (HAA5)	2006 5003506	QUARTERLY	1QT 2006

What happened? What is being done? (Describe corrective action)

What happen? The treatment plant operator failed to collect and analyze the required water samples at the required times. As a consequence, the required reports were not submitted as required.

What is being done? Going forward the treatment plant operator is or will collect required water samples as regulations require and submit reports in a timely manner. Every effort will be made to comply with the requisite regulations.
