## Convert adif to cabrillo

ADIF for Cabrillo ADIF's Cabrillo is a compact app designed to help you convert log files for amateur radio broadcasts. As the title clearly states, it allows you to extract relevant information from ... Size: 245 KBDownload Now ALL2DTA ALL2DTA is a Win32 command-line tool that allows you to create a Master Callsign Database file (DTA) used in many controversial programs, from various logs to ADIF, Cabrillo, and simple text formats. U... Size: 29 KBDownload now command team master database team master database repeat LogChecker with b LogChecker /b , you can edit, fill the magazine, check cabrillo format and headline, convert files from the most popular software magazines to Cabrillo and ADIF, print customizable files, calculate s... Size: 2.2 MBDownload will now edit the text magazine check out the magazine Cabrillo Text Editing format Cabrillo Evaluator loads and evaluate Cabrillo file magazine format for more than 305 contests, with automatic load of individual Ini profile files for each contest. Contestants can check and score their Cabrillo magazines b... Size: 3.9 MBDownload is now the journal appraiser's appraiser magazine appraiser to evaluate the magazine's DatzEdit program for editing and viewing ADIF files. This version includes a few additional features that are of interest to amateur radio. It can import the data of the NZO log in adif format and export to A... Size: 570 KBDownload now format ADIF Cabrillo for adif ASCII to ADIF ADIF MakeHistory Makehistory can be used to create callhistory.txt files for import, this should only be necessary where cabrillo logs from outdated registration programs. Program handles not only the magazine cabrillo... Size: 17 KBDownload is now the viewer manager of Log View Log log log text file manager LoTW converters for Logger32 Credits Program downloads data from LoTW and stored data in the format required by Logger32. This program can be used instead of the original ARRL scraper.exe program created by Bob Furzer, K4CY. LoTW to Logger32 uses part of the DXCred code for DXKeeper created by Alex Shovkoplas, VE3NEA. The source code of the LoTW to Logger32 program is available (for Article 1.20). version: 2.00, Date: 2013-09-28, size: 740 kb ADIF2CCGen ADIF for CheckCall generator. This program is designed to extract premium data from logger32's ADIF file (this is CNTY, USER2, and USER3) in the original CheckCall file. You can then enter the Premium acronym into the call box in the log window and have a message in the CheckCall window about that acronym. For example: there is an SPPA award (Polish districts). One of the districts is SIC - the city of Kielce. If I I have information in the CheckCall window: SIC - Confirm. If there is no information, it means that this is a new area for me. Use the right mouse to click on the rewards names (by default CNTY, USER2 and USER3) to change the names of the awards and anywhere on the on change the translation od worked and confirmed. New data is added to the existing CheckCall file. Version: 1.01, Size: 204 kb Log Recoverer This program is designed to recover data from the main logger32 log file (. ISD). If you can't open a log with Logger32, you can try using Log Recoverer to extract AO from the ISD file. All restored SSOs are stored in the ADIF file. Version 1.01 changed the ADIF fields for e/SL and LoTW SL. Warning: the system decimal separator should be set at the point (.) ! version: 1.01, size: 189 ADIF\_FILTER This program is designed to filter ADIF files. Entries may be selected for: FCA date, range (multi-choice active), Mode (multi-choice active), Zones (SH or ITU), AFL (paper received/sent, LoTW AFL received/sent, e/SL received/sent, SL for Printing (paper/LoTW/e/SL) - for Logger32, SL Printing - for TRX Manager, DXCC Country, Continent, Comment, User Identified, Select the necessary fields from the record in a user's defined order, Select unique entries from the ADIF field, select records based on the data in the external file, the number of SSOs with one station, filtered The original ADIF file is divided into two files: xxx\_filtered.adif with selected records and xxx\_unfiltered.adif with all other records from the xxx.adif file. Some statistics may be obtained: SSS on the strip, FSA in the mode, FCA per month, FSA per year, FSA sent/received (paper/LoTW/e/SL). version: 4.00, date: 2013-08-21, size: 307 kb ADIF2CABR This program is designed to convert the ADIF file from any software to register in the Cabrillo file. It can be used for all HF contests with one part of the exchange reports, such as serial numbers, zones, etc. SrX (serial received) field must be in the ADIF file, STX (serial sent) can be taken from the source file or can be generated by the program. Instead of an SRX field, you can use a different field (such as TH). STATE INFORMATION can also be converted to SRX. The Auto Increase option is useful if serial numbers have been sent, use this option very carefully (if there are any holes in the submitted reports) - check exactly the output of the file. More information about Cabrillo can be found on the Cabrillo page. The WW RTTY competition has been added in 3.10 (group two parts). version: 3.10, date: 2013.11.24, size: 250 kb ADIF2IOTA This is not a standard converter - the program generates IOTA statistics from the ADIF file in the continent division. I wrote it specifically for logger32 and IOTA competition originating at the SPDX Club, but it can be useful for any other logging software. version: 1.02, size: 192 kb ADIF2DXCC generates DXCC sheet records from the ADIF file. All records from the ADIF file are placed in a table and used to create DXCC write sheets (directly for the printer, MS Word, notepad, or Clipboard). The CSO data can also be manually entered. Every entry in the ADIF file must have a DXCC DXCC Version: 2.11, Date: 2011.08.17, Size: 433 kb ADIF2TEXT ADIF Files for Text File Converter. You can now convert ADIF files with 100,000 SSOs and 100 ADIF fields. You can select ADIF fields for space in the text file and field order. Version: 2.06, Date: 2014.06.24, Size: 178 kb DUPE\_Selector The program is designed to remove duplicates of the SSO from the magazine (file ADIF). The program compares adif fields: CALL, QSO\_DATE, BAND, MODE, and TIME\_ON - with the ability to determine the maximum time difference between AO or ignore TIME\_ON. The correct data (without duplicates) is stored in the ADIF file. DUPE SOS is stored in the second file (in the format of: first SSO and DUPE SSO). In addition, DUPE SSOs are stored in the third file with time changed from the first FSA to use it in Logger32 to update SL status - if the DUPE-recognized SSL status (synchronization option) is changed. Thanks to the use procedure to search DUPE please be patient - the work of the program can be a long .). version: 1.02, date: 2014.06.24, size: 204 kb DX2ADIF This program converts the ADIF file generated by DX4WIN into a more standard ADIF format. DX2ADIF adds a frequency field QSL\_VIA field, changes PSK/PSK33 mode to PSK31 mode, adds NAME and qTH fields (from the DX4WIN NOTES CALLSIGN field). For more support, you can add an OPERATOR field. version: 1.10, size: 195 kb ADIF DIVIDER This program is designed to separate one large ADIF file into many short ADIF files, for example, to send it to LoTW. In each new version of the ADIF file, you can set the number of EPOs: 1.00, size: 192 kb TEXT2ADIF Text files into the ADIF file converter. The program does not require witheding - unpack the mail file in any folder. Please read the help file - working with this program is more difficult than with the ADIF2TEXT program. Version: 1.06, Size: 387 KB WL2CABR SM6SRW wrote The WriteLog contest modul for the SPDX contest, but WriteLog allows you to save the SPDX magazine contest as an asc file only. My software converts the ASC log file from WL into the Cabrillo file required by the SPDX competition committee. This version takes into account the changes in the rules of the 2004 SPDX competition. For more information on the contest - take a look at the 2004 SPDX Rules Contest on the official SPDX contest page. Version: 4.01, Size: 286 KB WL2DX4WIN Program converts ADIF files from WriteLog into ADIF files for DX4WIN. Version: 2.12, Size: 186 KB EDI EDI Files Converter (EDI is the standard used in UHF/VHF contests like Cabrillo for HF). EDI files are converted into ADIF files for DX4WIN. version: 1.20, size: 185 kb MIX2DX4WIN This program changes the ADIF file generated by MixW to the ADIF file designed for DX4WIN. After the modification, the frequency is placed in the field for this FSO in DX4WIN. Text from the Comment for all SSO window is also added to this box. NAME AND qTH are placed in THE NOTES FOR THIS CALLA CALLA Version: 2.00, Size: 187kb MMTTY2DX4WIN How MIX2DX4WIN, but for MMTTY. version: 1.00, size: 184 kb A few days ago their had a discussion about the conversion of THE ADIF files Cabrillo. I never needed a Cabrillo outlet, so I didn't know that there was (FAIK) no converter available for Linux. A couple of hours later (actually a week later ), I have the first release adif2cabrillo. Enjoy... ON4 Please download version 1.0.5 from the download folder Documentation on how to install and use adif2cabrillo < Previous download Of Tutorial Advanced Tutorial (avi) Next > C' World Wide WPX Contest Almost all registration programs can export the file in amateur data exchange format (adif or adi). This page allows you to download the adif log file and convert it into the Cabrillo format required to send a log entry for the contest. The master converter has three simple steps. Enter the call used in the contest and select the file to download or paste it into the box. Select the entry category and other information you need to enter the competition. Enter your name and mailing address. Your magazine will be transformed into a Cabrillo format and is ready to present the WPX Contest to the robot. Please contact director@cqwpx.com with any questions. Adif to Cabrillo converter, designed by Tsvetomir Tishiishki, L'2F convert adif to cabrillo online. convert adif to cabrillo field day. convert adif file to cabrillo
