The 5th chapter of the San Francisco is coming to a close and if you've followed along, you should know why. Even if you haven't, please make sure you play the game so you understand what's going on. Here we begin the final chapter of San Francisco. The clues are in the door numbers, such as 7, 13, and 16. There are a total of 8 doors in all, so you only need to go around twice in order to find all the doors. The San Francisco is a challenge game with a lot of preparation and strategy. This is a 2-4 player game. 2 players are not enough to do the game justice and 4 players will be a bit cramped. So, I suggest 2-4 players. Some people like to pick a character before they play, but I would suggest that you choose your character last since this game is very car-orientated. Good luck to you! Printable version of the 5th chapter of the San Francisco at the end of the episode. In order to read it, you need to close all the windows and turn off all the music, if you have music playing. All the notes and door numbers are hidden in the script of the episode. For example, the door number is 7 because there are seven letters in the word 'San'. The word 'rat' (door number 13) is the same as the word 'ratty' and the word 'San' is the same as 'Satan'. It's pretty easy to see the clues. In the beginning, the cars are near the Key Bridge, but in the end, the cars are on Bay Bridge (most likely the end). I haven't explained it much in this episode, but the money is very important. There's only one car that gets to make money. When you do something good, you get money. When you do something bad, you lose money. When you do nothing, you stay the same. You lose at least a fraction of your car or more if you do nothing. If you do nothing, you will be at the bottom of the game if you have less than \$100,000. You can also earn money if you do good things, but that's up to you. The door number of your friend is your phone number. If you are a robot or a virus, your friend number is 0. Here is the map of all the possible routes you can take. I hope you enjoy my game. I know that you will. Related Tags Estimating the 520fdb1ae7
