

Highlights

- Safe SOC enablement program to increase the customer maturity and quality.
- Conduct assessment to make sure minimum cyber security controls are in the correct place.
- We design our safe engine to be plug and play and communicate with our SOC center.
- Engage our Cybersecurity Lab to perform hunting, analysis and increase quality of results.
- Comply with ISO, SAMA, NCA.

Safe SOC is a customized program as a service which is known as Managed SOC or SOC as a service. We developed Safe SOC to add value and reduce risks by combining Managed Security Services (MSS) for detection controls and Managed Detection and Response (MDR).

Based on our vision to achieve the highest level of cybersecurity and keeping cybersecurity simple and reliable, we developed the Safe Engine Appliance to facilitate Management, Operation, Hunting, Detection and Response, and increase the quality.
