Railway station code pdf

Wikipedia's list article is a list of IATA-index railway stations to which IATA is assigned codes similar to IATA airport codes. Such railway stations are commonly used in air rail alliance or code-sharing agreements (commonly known as Rail Fly) between airlines and rail lines, especially in Europe. By assigning the IATA code to the railway stations, passengers on trips involving these stations can be tickets all the way. Sometimes they can check in right up to their final destination without having to claim their baggage and check in again when changing between the rail and air parts of the trip. Elsewhere, passengers must carry their luggage on the train, but in any case do not need a separate train booking process. Airport rail lines at airports include: Austria Vienna International Airport Belgium Brussels Airport using the Belgian railways of Denmark Copenhagen airport, airfares that can be used for Swedish state railways (not Danish state railways). France's Charles de Gaulle airport near Roissy, France, with SNCF French railways and Eurostar. Gar de Lyon Saint-Exupery, the first airport to be served by a high-speed line. German International Airport Cologne Bonn Airport Dusseldorf Airport Leipzig /Airport Halle (AIRail Service with Deutsche Bahn). Schiphol Airport near Amsterdam, Netherlands. Air France-KLM offers tickets, including flights to and from Amsterdam or Paris with appropriate trains and/or buses to Belgium, Oslo Norwegian Airport, Trondheim's Gardermoen Airport (Flytoget), Stockholm-Arlanda Swedish Airport, tickets available for Swedish public railways.
