Edit: Daz has done this way, I'm recommending you follow his . Go to Windows Loader and download the file "Windows.7.ucw". Double-click on it and extract the file to your desktop. Run RounDr.exe, browse to the folder you saved the file in and select your Windows 7.ucw file. Press the Launch button. You're done! Go to . By Mark Hughes It appears that at least one former Rangers player will be shown the door when Dallas Eakins takes over for the fired John Tortorella. According to a report on the website Grantland, Wayne Primeau has been demoted from third-string goaltender to the AHL's Manitoba Moose. "It doesn't really matter to me," Primeau said of the demotion. "I don't know why that decision has been made, or what that decision means." "To be honest, the last couple weeks I haven't been playing as good as I have been," Primeau told Grantland. "I'm just trying to get things right and find that groove. It's a long season, and I just need to be playing better." Primeau is scheduled to appear in five NHL games before the end of the season, and will not be sent down to the Moose. Primeau, a native of Oakville, Ont., went 4-5 with a.874 save percentage and an.868 goals-against average with Texas this season. He also made a sensational attempt to block a shot with his face, but the play was ruled a no-goal due to goaltender interference. Primeau signed with the Rangers on July 1, 2015. His career has been spent in a top level American Hockey League. He has appeared in 75 games with the Binghamton Senators over the past three seasons, going 41-18-3 with a.918 save percentage and a 2.36 goals-against average.
