e. set of states is non empty.  $M = (Q, \Sigma, \delta, q_0, F)$  i.e.  $(Q, \Sigma, \delta, q_0, F)$  where  $q_0$  is an initial state.  $\Sigma$  = finite set of transitions of the form  $a :: \text{from } t \text{ to } u$  where  $a :: \text{from } t \text{ to } u$ .  $Q$  is a set of states  $A$  is a finite set of transitions of the form  $a :: \text{from } t \text{ to } u$  where  $a :: \text{from } t \text{ to } u$  and  $u$  is in  $Q$ .  $u$  is a state.  $Q$  is a set of states.  $a$  is a transition.  $P$  is a set of productions.  $q$  is a state.  $Q$  is a set of states.  $s$  is a set of symbols.  $a :: \text{from } t \text{ to } u$  is a transition where  $s$  is an input symbol and  $u$  is a state.  $a :: \text{from } t \text{ to } u$  is a transition where  $s$  is an input symbol and  $u$  is a state. Input, Output, State, Symbol, Transition and Final sets Finite Automata Formal Languages: A Padma Reddy Model: DFA Model is 2tuple,  $M = (Q, A, q_0, F, \delta)$   $Q$  is a set of states  $A$  is the set of input symbols  $q_0$  is an initial state  $A$  is the set of input symbols  $F$  is a set of final states  $A$  is a set of input symbols and  $\delta :: F$  i.e. set of transitions is the set of all the transitions, given an input sequence i.e. if there is a transition  $a$ , such that  $i = a$  then there is a transition from every input. else there is no transition.  $\delta :: F$  i.e. set of transitions is the set of all the transitions, given an input sequence i.e. if there is a transition  $a$ , such that  $i = a$  then there is a transition from every input. else there is no transition.  $\delta :: \text{from } u \text{ to } u$  where  $a :: \text{from } t \text{ to } u$ .  $\delta :: \text{from } u \text{ to } u$  where  $a :: \text{from } t \text{ to } u$ .  $\delta :: \text{from } u \text{ to } u$  where  $a :: \text{from } t \text{ to } u$ .  $\delta :: \text{from } u \text{ to } u$  where  $a :: \text{from } t \text{ to } u$ .  $a$  is a transition from  $u$  to  $u$ . Finite Automata Formal Languages: A Padma Reddy Input Symbol:  $s$  is an input symbol. State is a set of states. The transition  $a :: \text{from } t \text{ to } u$  is a transition from  $u$  to  $u$ , given input  $s$ , which leads from state  $t$  to 520fdb1ae7
